

# RRP M&E and IM Review

Strengths and Weaknesses

Lessons Learned

Way Forward

# RRP M&E and IM: Strengths

- \* Common indicators (country and regional), and indicator tracking tool and system, through ActivityInfo
- \* Integrated reporting system through AI at country level
- \* RRP Portal: common repository of data, reports and maps, Assessment Registry & a strong coordination tool allowing flexibility at country level
- \* Work of the IMWG and sub-groups (Data, AWG)
- \* Regional Monthly (dashboard), Mid-Year, and End-Year Reports

# Lessons Learned

- \* Mid-term review process could be time-saving if integrated country-regional
- \* Indicators of RRP 6 doc and dashboards not fully aligned.
- \* Need for separate dashboards/sections by type of indicator/reporting: i.e monthly, quarterly, periodic surveys.

# RRP M&E and IM: Weaknesses

- \* Indicator design issues: i) too high level; ii) Output focus, not Outcome; iii) Mix of Outcome and Output indicators, lack of logic in Results Chain
- \* Outcome indicators to be measured through separate monitoring system, like periodic Outcome Surveys
- \* Existing Outcome Assessments not consistent within or among countries
- \* Target group identification difficulties: “impacted communities” are not all “in need” or “vulnerable”, so consistent sampling is a challenge

# RRP M&E and IM: Weaknesses

- \* Financial Tracking not well developed, and tracking by sector/partner is insufficient
- \* Project and activities by individual partner actors not tracked by AI (but through 3/4/5Ws sheets)
- \* Indicators of Institutional Support and Development of Laws/Policies not well defined: problem of common definition of stage for reporting/tracking

# Way Forward: Issues and Proposals

- \* **Extension/adjustment of AI**
  - \* with reinforced training
  - \* Issue tracker and response system for the AI (see Trello or other)
- \* **How to integrate Resilience in the M&E system?**
  - \* Specific resilience indicators, integrated into the common system, or separate systems?
  - \* Resilience Markers as tracking support tool
- \* **Need to define 3RP objectives/outcome level indicators and output indicators following results chains and design country and regional tracking system**

# Way Forward: Issues and Proposals

- \* **Improve financial tracking systems, including project/activity tracking and aggregation by sector**
  - \* Non-humanitarian FTS development. Links to other systems: D-Portal, DAC, IATI.
  - \* 4Ws and sector financial tracking, integrated with AI
- **Gender Indicators and Markers**
  - Application and review of 3RP submissions
- **Regional 3RP Dashboard(s)**
  - Impact indicators and tracking system(s)

# Discussion in Groups

- \* Is this a complete Issue and Challenge log? What is missing?
- \* Looking forward, how do we use existing tools and lessons learned to address these challenges? Which key additional tools and systems do we need?
