

281 Organizations with the capacity to provide humanitarian services in July, August and September 2014

* **Operational Capacity is defined as:** the potential ability of an organization to deliver humanitarian services if needed. In addition to organizations currently delivering services, organizations that have the ability to access and deliver services are considered. If a large organization or UN agency is implementing a project through an implementing partner (independent humanitarian actors only, NOT Government and NOT Private Contractors), the implementing partner that is physically accessing and delivering the service in the district is considered.

Number for each cluster is the count of reported Organizations. Number in 'All Clusters' is the unique count of reported organizations for all the clusters.
