Candidature process / Processus de candidature

Article

Selected article

Brasília 2000: Candidate for Olympic Games in Brazil

Marcia De Franceschi Neto-Wacker, Christian Wacker. IN: Journal of Olympic history, volume 24, number 1, 2016, pp. 16-19.

This article focuses on the Brasília 2000 candidature which failed in the early stages.

Article

[Political framing of sports: the mediated politicisation of Oslo's interest in bidding for the 2022 Winter Olympics](#)

Ørnulf Seippel... [et al.]. IN: International journal of sport policy and politics, 14 May 2016, Ahead of print, 15 pages.

For years, there had been discussions on whether the city of Oslo should make a bid for the Winter Olympics 2022. In 2012, it was decided that the issue should be the topic for an advisory referendum in 2013. This guaranteed the presence of a sport issue on the public agenda for a longer period. The study uses the occasion of the referendum to analyze how a sports issue was framed politically through a content analysis of articles on the issue in a selection of Norwegian papers the year leading up to the election.

[Rio 2016 and disability: an analysis on the sport-for-development discourse and the legacies for disabled people](#)

Leonardo Mataruna ... [et al.] IN: Journal of sport for development, volume 3, issue 5, December 2015, 11 pages.

This paper investigates how the legacy of the 2016 Paralympic Games, in Rio de Janeiro, has been discussed on the Facebook page 'Cidade Olímpica.' The City Council of Rio De Janeiro manages this page, which uses the sport-for-development discourse in order to disclose information about projects that are being developed in the city, and to justify the investments that are made with public money. Furthermore, the main objective of this paper is to identify whether the sport-for-development discourse has been used to discuss the legacies for disabled people.

Article

Brazil post's Rio 2016 Olympic issues

Mark Maestroni. IN: Journal of sports philately, March 2016, pp. 32-35.

This article describes the stamps designed for the Rio Olympics by the Games of the XXXIst Olympiad.

[Authorised ticket resellers list: Paralympic Games Rio 2016](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2015-2016, 2 vol.

This document presents the list of the authorised ticket resellers for the Paralympic Games in Rio 2016 by continent.

This publication also exists in [Portuguese](#).

[Carioca hospitality programme: Rio 2016](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2015, 27 p.

The "Hospitality programme" at the Rio 2016 Games venues was designed to attend the specific needs of partners and their clients in a transparent and flexible manner. In this guide, you will find information and standards that will help in your choice, and in the planning of this incredible experience.

This publication also exists in [Portuguese](#).

[Catálogo de produtos oficiais Rio 2016 = Rio 2016 licensed products catalogue](#)

Comitê Organizador dos Jogos Olímpicos e Paralímpicos Rio 2016, 2015-2016.

At every stage of the event organisation there are traces of all the emotion, excitement and experiences that sport provides. Preparing for the Games is a complex task and a unique challenge: inspiring the world with the Olympic and Paralympic ideals. In this catalogue all the official, licensed products are presented. You can also find useful information about the Games, which are coming to South America for the first time.

[Focus: Rio 2016 sustainability report](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2015, 33 p.

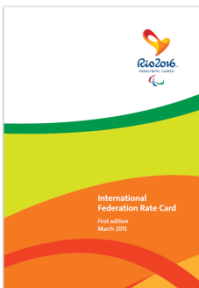

With one year to go before the start of the first Olympic and Paralympic Games to be held in South America, the Organising Committee for the Olympic and Paralympic Games in Rio in 2016 has been presented with a series of challenges and opportunities. On its journey towards 2016, it has taken up the commitment to use the force of sports and sustainability in order to leverage transformations in people as well as the city. Since 2009, it has strengthened its relationship with sustainability so that it features in each detail of Games organisation. From medals to the food served, from volunteers' uniforms to athletes' transport, all the way through the visual identity, overlays and torch relay. This report presents the sustainability strategy of the Organising Committee for the Olympic and Paralympic Games in Rio in 2016.

[International Federation rate card: Olympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2015, 2 vol.

These catalogues list all items that will be available for the International Federations through the Rio 2016 Rate Card portal. They contain also the terms and conditions for all the IF's purchases.

[International Federation rate card: Rio 2016 Paralympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2015, 58 p.

This catalogue lists all items that will be available for the International Federations through the Rio 2016 Rate Card portal. It contains also the terms and conditions for all the IF's purchases.

[Legal ticket guide: Rio 2016](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2016, 1 vol.

In 2016, Rio de Janeiro will host the Olympic and Paralympic Games, the first time they have been staged in South America. It is natural that everybody wants to be part of this once-in-a-lifetime moment. However, many people end up taking advantage of the fans' excitement to sell illegal and counterfeit tickets. That is why this guide has been created, so that you may be aware of what can and cannot be done when it comes to tickets sales for the Rio 2016 Games, avoiding any pitfalls.

This publication also exists in [Portuguese](#).

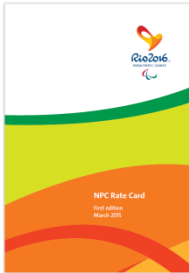

[NOC rate card: Olympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016, 2015, 2 vol.

These catalogues list all items that will be available for the National Olympic Committees through the Rio 2016 Rate Card portal. They contain also the terms and conditions for all the NOC's purchases.

This document exists also in [French](#), [Spanish](#) and [Portuguese](#).

[NPC rate card: Paralympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016. 2015, 71 p.

This catalogue lists all items that will be available for the National Paralympic Committees through the Rio 2016 Rate Card portal. It contains also the terms and conditions for all the NPC's purchases.

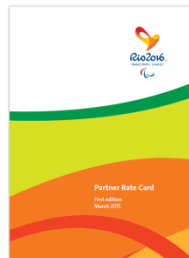

This document exists also in [French](#).

[Partner rate card: Olympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016. 2015, 2 vol.

This catalogue lists all items that will be available for the official marketing partners through the Rio 2016 Rate Card portal. It contains also the terms and conditions for all the official marketing partner's purchases.

[Partner rate card: Paralympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016. 2015, 60 p.

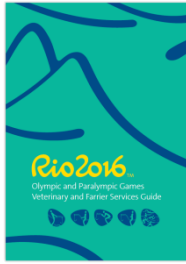

This catalogue lists all items that will be available for the official marketing partners through the Rio 2016 Rate Card portal. It contains also the terms and conditions for all the official marketing partner's purchases.

[Press rate card: Paralympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016. 2015, 65 p.

This catalogue provides a general overview of the press rate card programme, in an effort to make it as user-friendly as possible for the accredited written and photographic press and non-rights-holding broadcasters.

[Veterinary and farrier services guide: Rio 2016 Olympic and Paralympic Games](#)

Organising Committee for the Olympic and Paralympic Games in Rio in 2016. 2016, 23 p.

The "Rio 2016 Veterinary and Farrier Services Guide" is a concise source of information about the provision of veterinary services at the Rio 2016 Olympic and Paralympic Games. It summarises the staff, services and facilities that will be available in order to ensure that the best possible support is provided to all horses competing in the Games.

Selected article

[The logic of memory: "paroxysms of tears and joy" for the London Olympics and the Bhopal disaster](#)

Rachel Shields... [et al.]. IN: Memory studies, 22 May 2016, Ahead of print.

This article focuses on the current debate in memory studies regarding the definition and nature of the phenomenon of collective memory. Using the controversy over Dow Chemical Corporation's sponsorship of the London Olympic stadium in 2012 as an example, the article theorizes memory as inherently logical-that is, as necessary to the maintenance of the overarching logics that govern the political and economic forms of a given society.

[The Olympic family?: young people, family practices and the London 2012 Olympic Games](#)

Elizabeth Such. IN: International journal of sport policy and politics, volume 8, issue 2, 2016, pp. 189-206.

The London Olympic and Paralympic Games in 2012 sought to 'Inspire a Generation' of young people to engage in sport. This article explores the ways in which a group of young people in the North West of England and the East of Scotland experienced the Games in the context of their everyday family and relational lives.

Montreal 1976 / Montréal 1976

Roger Taillibert : the Olympic park in Montreal : sketches = Roger Taillibert : le Parc Olympique de Montréal : croquis

Alain Orlandini. Somogy Editions D'Art, 2016, 159 p.

Pour accueillir les Jeux Olympiques d'été de 1976, la ville de Montréal confie la réalisation du parc olympique à l'architecte français Roger Taillibert, qui édifie un stade omnisport ellipsoïdal couvert, en béton préfabriqué, de 65000 places, ouvert au centre et surmonté d'une tour inclinée de 175 mètres de hauteur: la plus haute au monde ! Roger Taillibert a consacré sa carrière à construire pour le sport et dans l'esprit du sport, l'esprit du record à atteindre, en tirant des matériaux et des techniques le maximum de ressources utiles et expressives; faire de l'art par les moyens de la technique. Le Parc des Princes de Paris, édifié de 1969 à 1972, reste l'une de ses réalisations majeures. Élu à l'Académie des beaux-arts en 1983, président de l'Académie en 2004 et 2010, président de l'Institut de France en 2010, il est en outre membre de l'Académie des sports. Pour accompagner les festivités du 40ème anniversaire des Jeux Olympiques d'été de Montréal, cet ouvrage nous livre à travers les dessins et croquis de Roger Taillibert tout le processus de réflexion et d'élaboration autour de ce bâtiment, devenu le lieu emblématique de la vie sportive et du tourisme à Montréal, un bâtiment qui a accueilli plus de 67 millions de visiteurs depuis son inauguration. [Designing and constructing the Olympic roof \(Munich 1972\)](#)

Jos Tomlow. IN: International journal of space structures, 2 May 2016, Ahead of print.

Designing and building the stadium complex for the International Olympic Games 1972 in Munich in only five years, may be characterized as a singular challenge. Based on written reports and testimonials from witnesses of the process, the paper analyses all phases, starting from the skepticism of many that the most spectacular part, the roof, would be buildable. Finally, the spectacular Olympic stadium complex was much appreciated by visitors, and critics ranked it as one of the most impressive and innovative examples of German architecture.

[Opening ceremonies of international sports events: the other face of Chinese soft power](#)

Daniel Ricardo Lemus Delgado. IN: The international journal of the history of sport, 21 March 2016, Ahead of print, 17 pages.

This paper analyzes the relationship between the opening ceremonies of international sports events and the building of a positive image of China. It first discusses the concept of soft power in the Chinese case and then analyzes the opening ceremonies of four international sport events: the Summer Olympic Games (2008), the Asian Games (2010), Universiade Games (2012), and the Youth Olympic Games (2014).

Arts style and national identity reflected in the Olympics opening ceremonies: a comparison of the 2008 Beijing Olympics and the 2012 London Olympics

Myung-Sook Parka, Hyae-Syn Taea. IN: Quest, vol. 68, no. 2, pp. 170-192.

The study compared and analyzed the opening ceremonies of the 2008 Beijing Olympics and the 2012 London Olympics, representing Asia and Europe, respectively. In the aspect of the national identity, the opening ceremony of the 2008 Olympics was a cluster of the "Imperial China" which proposed the image of China as a powerhouse in the future world. The 2012 London Olympics showed the concept of value-oriented populism with the analog methods to express the British society.

Cultural Olympiad / Olympiade culturelle

Cultural Views of the Olympics

"citius, altius, fortius, pulchrius, humanius"

Cultural views of the Olympics "citius, altius, fortius, pulchrius, humanius"

Norbert Müller... [et al.]. Agon Sportverlag, 2016, 231 p.

Coubertin valued "beauty [as] the involvement of the arts and the mind in the [Olympic] Games [...] to be realized through participation in the Games" as an essential element of modern Olympism. Therefore, Hans Lenk, gold medalist 1960 and great international philosopher, proposed an extension of the Olympic Motto into "citius-altius-fortiu-pulchrius-humanius" to include aesthetic and humanistic thoughts constructing an Olympic ideal. Inspired by Lenk's proposal, the editors chose to extended motto as subtitle of this book to accentuate the "cultural views of Olympics". The goal assigned to the Olympic cultural program by the IOC is to promote harmonious relations, mutual understanding and friendship among the participants and visitors of the Olympic Games.

**Revisiting the Salt Lake City Olympic scandal: would the outcome be different today?**

M. Dodds. IN: Choregia sport management international journal, volume 12, number 1, 2016, pp. 1-14.

Many international sport organizations face bribery scandals resulting from its event bidding process. The International Olympic Committee (IOC) faced this type of scandal with the 2002 Olympic Winter Games. Can a new interpretation of the United States' anti-bribery law, the Foreign Corrupt Practices Act (FCPA), be effective in preventing similar sport scandals?

The other Upton Park: the forgotten Olympic champions

Peter Hamersley. IN: Journal of Olympic history, volume 24, number 1, 2016, pp. 28-37.

The Velodrome at Vincennes, built in 1894, was the venue for cycling, archery, gymnastics and the team games (football, rugby and cricket) in 1900. They were all part of the international sports competitions of the Paris World Exhibition, which did bore little resemblance to present day Olympic Games. Thus in football, there was no tournament. Only two games took place. The winners of these matches, Great Britain and France, are considered "Olympic champions".

Olympic coins: Helsinki 1952 - Rio 2016: catalogue, price, recommendations: how to collect Olympic coins?

Albert M. Beck. Battenberg 2016, 190 p.

This Olympic catalogue is a historical retrospective of Olympic coins issues. It describes and evaluates all official Olympic coins issued by the organizers of Olympiads since 1952 (Helsinki) to 2016 (Rio). The author has been promoting Olympic coins for about 40 years by supporting the Olympic coin issues with presentations, press releases and lectures. Texts and images show his experiences and memories in this new Olympic catalogue, which is a valuable reference book by a professional connoisseur of Olympic coins.

Article

[Going for the gold: the economics of the Olympics](#)

Robert A. Baade, Victor A. Matheson. IN: Journal of economic perspectives, volume 30, number 2, Spring 2016, pp. 201-218.

In this paper, we explore the costs and benefits of hosting the Olympic Games. On the cost side, there are three major categories: general infrastructure; specific sports infrastructure required for competition venues; and operational costs. Three major categories of benefits also exist: the short-run benefits of tourist spending during the Games; the long-run benefits or the "Olympic legacy"; and intangible benefits such as the "feel-good effect" or civic pride.

Article

[The Olympics, sustainability, and greenwashing: the Rio 2016 Summer Games](#)

Jules Boykoff, Gilmar Mascarenhas. IN: Capitalism nature socialism, volume 27, issue 2, 2016, pp. 1-11.

With its Olympic Agenda 2020, the IOC supports the United Nations 2030 Agenda for Sustainability Agenda and is in line with its objectives. This article focuses on this new sustainability strategy and what it means.

Article

**How sport governance impacted on Olympic legacy: a study of unintended consequences and the 'sport makers' volunteering programme**

Geoff Nichols... [et al.]. IN: Managing sport and leisure, 10 May 2016, Ahead of print.

This paper focuses on Sport England's Sport Makers programme - which aimed to generate new sports volunteers as part of a 2012 Olympic and Paralympic Games legacy - as an illustration of the unintended consequences of a 'top-down', managerialist governance system.

Report

**Rio de Janeiro's emerging sporting mega-event geography: unraveling the Carioca pattern of urban development**

Ryan James Goode. ProQuest, 2015, 407 p.

In a span of two years the city of Rio de Janeiro will have hosted two of the biggest sporting events in the world, the 2014 World Cup and 2016 Summer Olympics. As the author argues throughout this dissertation, the potential these sporting mega-events hold for attracting capital investment to the city is immense. And, as such, the city of Rio de Janeiro has unveiled a dizzying array of new urban policy initiatives designed to prepare the city for the mega-event and in the process make the city an attractive space for international investors. The consequences of these policies, the author argues, are irrevocably altering the socio-spatial structure of the city creating new landscapes for tourist consumption and zones for real estate speculation. In the process, the city of Rio de Janeiro is permanently reconfiguring its nearly 450-year-old urban settlement pattern characterized by a relatively high-percentage of low-income residents occupying residencies in and near the urban core. This dissertation examines how this process is unfolding across the city. The findings suggest low-income residents are being pushed to the periphery of the city through both 'hard' displacement (forced evictions) as well as 'soft' forms of displacement, including gentrification. This research specifically focuses on the latter, exploring the various ways in which gentrified landscapes in Rio de Janeiro's sporting mega-event city have been produced.

[The London 2012 food legacy: update](#)

International Olympic Committee. IOC, 2015, 16 p.

One of the most successful, and yet lesser-known impacts of the London 2012 Games is the success of its sustainable food vision. It's been more than three years since the London 2012 Olympic flag passed from London to Rio, but the English capital's Olympic food legacy lives on in many different ways. Inspired by the London 2012 Olympic Games, three ground-breaking projects have created a powerful legacy for sustainable food in London and across the UK: 1. Food Legacy 2012: A UK-wide project that has seen leading caterers and other organisations adopt London 2012's sustainable food standards. These organisations, such as the Metropolitan Police and Transport for London, serve in excess of 200 million meals per year. 2. Sustainable Fish Cities: An Olympic initiative, encouraging the UK catering industry, businesses, government and others to pledge their commitment to serving sustainable fish. To date, 400,000 UK government employees now eat only sustainably caught fish, and the value of fish per year the UK government has committed to buy from sustainable sources is £17 million. 3. Capital Growth: A Games-inspired project that surpassed its goal of establishing 2,012 new community food growing spaces in London by 2012. This case study, compiled in 2015 by the IOC provides a good overview of the positive impacts of the legacy of these Games.

Ancient Olympic Games / Jeux Olympiques antiques

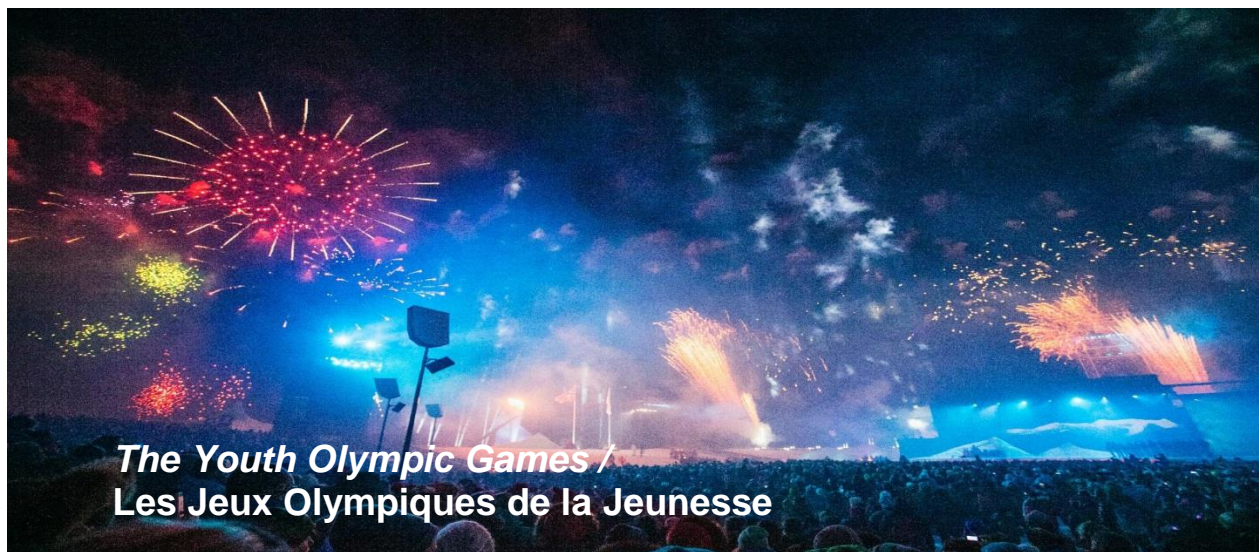

The origins of the Olympic Games

Andras Patay-Horvath. *Archaeolingua*, 2015, 156 p.

Even in Antiquity it was debated when and why the Olympic Games had been established and by whom. Modern scholarship has also advanced a great number of hypotheses on the origins of the Games (ranging from funeral Games to harvest ceremonies/vegetation magic or even initiation rites), but a truly convincing reconstruction has not yet been formulated. The present volume offers a new comprehensive explanation for the phenomenon and argues that the Games evolved from hunting and from animal ceremonialism observed among various hunting groups. This explanation is admittedly a hypothetical one, based mainly on the interpretation of the archaeological material and some ethnographic parallels, but conjecture is necessary due to the complete absence of contemporary written evidence. In addition, although it is essentially a simple theory that simultaneously explains many perplexing features of the Games in a coherent way, it must remain without definitive proof, as with all other previous.

[Guidelines regarding authorised identifications: Winter Youth Olympic Games Lillehammer 2016](#)

International Olympic Committee. 2015, 14 p.

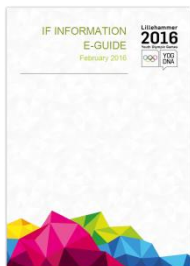

These guidelines provide guidance on how Olympic Charter Rule 50 is to be implemented, in particular (i) as to when an identification is remarked conspicuously for advertising purposes, (and hence prohibited), (ii) which types of identifications are allowed, (iii) where such identifications may be placed and (iv) how many times such identifications may appear. These rules apply to all of the athletes, officials and other accredited persons within the YOG venues and sites. These guidelines are not intended to restrict or otherwise impair new, innovative technological design features of Items (as defined below) as long as these are in conformity with the rules and regulations applicable for the sports concerned, the Olympic Charter and these guidelines.

Humble heroes: Lillehammer 2016 Youth Olympic Games : go beyond, create tomorrow

Lillehammer Youth Olympic Games Organizing Committee. 2016, 78 p.

This guide is published for the volunteers working at the Lillehammer Youth Olympic Games 2016 (names the Humble Heroes). It contains general information about the Youth Olympic Games as well as practical information about the services, the venues and the ceremonies.

Pierre de Coubertin

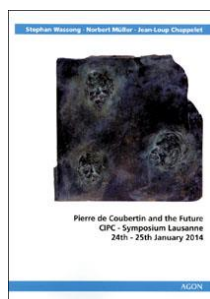

PdC: Pierre de Coubertin und die Olympia-Philatelie

Rüdiger Fritz, Volker Kluge. Alpheios, 2015, 256 p.

This book, prefaced by Jacques de Navacelle de Coubertin, focus entirely on the Olympic philately to which Coubertin contributed to a great deal. Between the IOC Sessions Coubertin stayed in contact with his co-workers by writing a huge number of postcards which he usually signed with "PdC". Probably Coubertin has never been an Olympic philatelist himself. But the topic is especially interesting because there is no other person worldwide who was shown on a postage stamp more often than him. Although the first stamps were published only after Coubertin's death in Haiti in 1939, meanwhile there are 79 countries which edited stamps with his portrait. The book presents the most beautiful and popular Coubertin stamps most of whose originals belong to Rüdiger Fritz. It also assembles, to some extent unpublished, philatelic products and documents which relate to famous athletes, Coubertin's colleagues as well as his time and their protagonists.

This publication is only available in German.

Pierre de Coubertin and the future: CIPC-Symposium Lausanne 24th-25th January 2014

Stephan Wassong... [et al.]. Agon Sportverlag, 2016, 264 p.

On the occasion of Pierre de Coubertin's (1863-1937) 150th anniversary, the International Pierre de Coubertin Committee (CIPC) organized a symposium in collaboration with The Olympic Museum Lausanne in January 2014. The symposium's topic was Pierre de Coubertin and the Future and concluded the jubilee year of Coubertin's 150th birthday. Lectures and discussions focused on considerations on how to adapt Coubertin's idea of an educationally oriented sport to the demands and nature of today's sporting world and society. The contributors evaluated Coubertin's thoughts and their current meaning from various international and cultural perspectives. This book is largely a collection of the papers presented at the symposium.

Report

[Competitiveness of the Hungarian elite sport system](#)

Erika Gulyás. 2016. 58 p.

Postgraduate research grant programme 2015 Olympic Studies Centre, International Olympic Committee

This paper presents the initial results of significant research conducted under the IOC PhD Student Research Grant Programme with the support of the Hungarian Olympic Committee. The main objectives of the research were to understand why Hungary is successful in specific sports and to explore the relationship between elite sport policy systems and success in international competitions. The increasing international sporting competition forces governments to invest more money in elite sport development just so they can maintain their elite sport success as the supply of medals remains basically constant. A macro- and meso-level analysis were conducted within the framework of this research. The data collection based on information gained through an overall questionnaire and interviews with main stakeholders, coaches and athletes within national sport federations (De Bosscher, 2010). The data collection was focused on the sixteen prioritised sport federations and the five team sports which benefited from a tax relief system. Secondary data were collected regarding the national public funding for sport, elite sport and sport by sport since 2006, and an Infostrada database was used to analyse historical performance in the different disciplines and compare Hungarian performance with those of other countries. This research will provide information to policy makers about the competitive position of Hungary in elite sport and, in this respect, explore the critical success factors which will allow Hungary to assess how best to manage its future success in an increasingly competitive international environment.

Indonesia / Indonésie

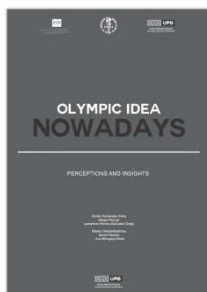

The history of National Sports Committee of Indonesia (KONI Pusat) 1938-2015

National Sports Committee of Indonesia. 2015, 318 p.

This book attempts to describe precisely and clearly the history of National Sports Committee of Indonesia (KONI) and Indonesian sports. While some believed for years that central KONI had been established in 1966, the historical facts indicate that the forerunners of national sport governing bodies have been around since 1938.

[Exploring China's success at the Olympic Games: a competitive advantage approach](#)

Jinming Zhenga, Shushu Chenb. IN: European sport management quarterly, vol. 16, no. 2, pp. 148-171.

This study examines China's deliberate Olympic medal strategy and how China has become one of the most successful superpowers at the Summer Olympic Games within the last two decades by virtue of the application of the competitive advantage framework.

Report

[Early developmental environment and Olympic success: analysis of an Australian sporting "hotspot"](#)

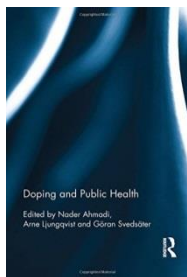

Kristy O'Neill. 2015, 64 p.

Postgraduate research grant programme 2015 Olympic Studies Centre, International Olympic Committee.

This study aims to identify an Australian sporting "hotspot" and the reasons for its ability to produce a greater relative number of Summer Olympic representatives 1984-2012 per head of the population. The overall study adopted a mixed-methods approach, with the first stage identifying the "hotspot" using publicly available, biographical data on all known (n = 2160) Australian Summer Olympians 1984-2012. The "hotspot" was examined through utilising a case study methodology within the context of Bronfenbrenner's (1979, 2005) "Ecological Systems Theory". Both community and Olympian's perceptions regarding why the "hotspot" occurred and the influence it has had on the athletic development of these Olympians was investigated. The results determined that a range of demographic, geographic, historical, social and fortuitous factors contributed to the creation of this "hotspot". Access to build and natural facilities, climate, family influence, schools, strong community clubs, opportunity to train and compete with older athletes, access to role models, high socioeconomic status and an endemic sports culture were amongst key contributing factors underlying the development of this "hotspot". Although many of these features appear to be unique to the "hotspot" area in Perth, Western Australia, some have potential to be transferred to other athlete development environments.

Anti-doping / Anti-dopage

Doping and public health

Nader Ahmadi... [et al.]. Routledge, 2016, 151 p.

"Doping and public health" incorporates the latest research to provide a comprehensive guide to the key aspects of doping as a social phenomenon. Divided into six parts, this collection of studies offers detailed insight into: ideals of health and fitness in today's society ; reasons behind the use of doping ; medical and social consequences of doping ; the importance of a doping-free society ; challenges to the detection and prevention of doping ; the global anti-doping movement. This book is a valuable resource for sport students, instructors and sport professionals, and will also be of interest to educators and policy-makers working in the areas of health, criminology, sociology and law.

[Anti-doping and legitimacy: an international survey of elite athletes' perceptions](#)

Anna Efverström, Nader Ahmadi, David Hoff. IN: International journal of sport policy and politics, 18 May 2016, Ahead of print, 24 pages.

Anti-doping work is a comprehensive enterprise that entails control and governance of elite athletes' everyday lives. However, in policy-making regarding doping and anti-doping in elite sports, the athletes' perspective has not been considered adequately. Focusing on elite athletes' perceptions of anti-doping as both principle and praxis, the study aimed to analyse how these perceptions can be understood from a legitimacy perspective. A survey study involving 261 elite athletes from 51 different countries and four international sports federations was conducted.

Psychologie du dopage

Denis Hauw. De Boeck Supérieur, 2016, 331 p.

Cet ouvrage dresse un état des lieux des connaissances actuelles portant sur les mécanismes psychologiques associés à la consommation de substances en sport et au dopage pharmacologique. Les théories utilisées à ce jour pour prédire et expliquer ces phénomènes sont décrites avec leurs conséquences pratiques sur la prévention. Les outils d'investigation utilisés sont présentés et mis en perspective. Une revue détaillée des procédures de prévention, d'information, d'accompagnement des sportifs est également réalisée et illustrée de nombreux exemples et cas concrets. L'ouvrage fournit un support détaillé permettant à toute personne intéressée par cette problématique de construire une connaissance approfondie de la question.

Dope hunters: the influence of scientists on the global fight against doping in sport, 1967-1992

Jörg Krieger. Common Ground Publishing, 2016, 394 p.

Based on extensive multi-national and multi-lingual archival research, this book examines the evolution of scientific knowledge within the international Anti-Doping community that coalesced during the second half of the twentieth century. Two key figures from a group of leading scientific experts serve as the focal points of the investigation, British pharmacologist Arnold Beckett and German biochemist Manfred Donike. After supporting early Anti-Doping initiatives in the late 1960s and 1970s, they became highly influential in such leading sports organizations as the International Olympic Committee and the International Association of Athletics Federations. From the 1980s onward, the international sport system relied heavily on their network of Anti-Doping laboratory experts in maintaining and advancing a rigid testing regime. Hence, this book offers a nuanced analysis of the establishment of the structures and initiatives in the global fight against doping in sport.

Parental support in sports development of Brazilian gymnasts participants in the Olympic Games (1980-2004)

Laurita Marconi Schiavon, Daniela Bento Soares. IN: Revista Brasileira de educação física e esporte, volume 30, number 1, Jan/Mar 2016, pp. 109-118.

Sports development involves important aspects that collaborate towards the achievement of a high level sports performance. Parental support is one such fact to be considered in Long Term Athlete Development (LTAD), capable of benefiting or harming athletes if not adequately administered. This study registers and discusses the importance of parental support in female artistic gymnastics, from the perspective of Brazilian gymnasts who have participated in the Olympic Games. The method used was oral history with the technique known as oral testimony.

Arthroscopy and sport injuries: applications in high-level athletes

Piero Volpi. Springer, 2016, 457 p.

This book describes the current applications of arthroscopy in a very wide range of sports injuries involving, among other sites, the hip, knee, ankle, shoulder, elbow, and wrist. For each condition, mechanisms of injury are explained and the role of arthroscopy in diagnosis and treatment is described. Relevant information is also provided on the epidemiology and mechanisms of injury in specific sports and on indications for treatment and rehabilitation. The book fully reflects the recent advances that have taken place in arthroscopy, permitting more accurate assessment and more successful management of post-traumatic pathologies. Furthermore, it acknowledges that as a result of the increasing use of new technologies and biomaterials, there is now particular interest in techniques that promote biological healing of articular lesions and permit complete functional recovery. The authors are leading specialists in the field who have aimed to provide practitioners with the clear guidance that they require on the evaluation and treatment of injuries incurred during sporting activity.

Waterman: the life and times of Duke Kahanamoku

David Davis. University of Nebraska Press, 2015, 315 p.

"Waterman" is the first comprehensive biography of Duke Kahanamoku (1890-1968): swimmer, surfer, Olympic gold medalist, Hawaiian icon, Waterman. Long before Michael Phelps and Mark Spitz made their splashes in the pool, Kahanamoku emerged from the backwaters of Waikiki to become America's first superstar Olympic swimmer. The original human fish set dozens of world records and topped the world rankings for more than a decade; his rivalry with Johnny Weissmuller transformed competitive swimming from an insignificant sideshow into a headliner event. Kahanamoku used his Olympic renown to introduce the sport of surf-riding, an activity unknown beyond the Hawaiian Islands, to the world.

Out in sport: the experiences of openly gay and lesbian athletes in competitive sport

Eric Anderson... [et al.]. Routledge, 2016, 177 p.

This book represents the most comprehensive examination of the experiences of gays and lesbians in sport ever produced. Drawing on interviews with openly gay and lesbian athletes in the US and the UK, as well as media accounts, the book examines the experiences of "out" men and women, at recreational, high school, university and professional levels, in addition to those competing in gay sport leagues. Offering a new approach to understanding this important topic, "Out in sport" is essential reading for students and scholars of sport studies, LGBT studies and sociology, as well as sports practitioners and trainers.

MA 27715

Gender testing in sport: ethics, cases and controversies

Sandy Montañola... [et al.]. Routledge, 2016, 196 p.

After the young South African athlete Caster Semenya won the 800m title at the 2009 World Championships she was obliged to undergo gender testing and was temporarily withdrawn from international competition. The way that this controversy unfolded represents a rich and multi-layered example of the construction of gender in wider society and the interrelationships between sport, culture and the media. This is the first book to explore the case in depth, from socio-cultural, ethical and legal perspectives. Analysing what came to be called "the Caster Semenya Case" in a comprehensive and multi-disciplinary fashion, and covering issues from media discourses and the rhetoric and regulations of the sport's governing bodies to the reaction of the athlete herself, the book explores the ethics of how gender norms in sport, and in society more generally, are constructed through appearance, behaviour and sporting performance.

Report

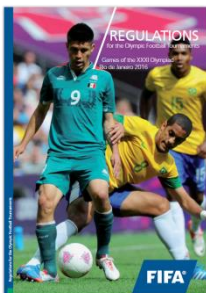

[Where the English refused to tread: India's role in establishing hockey as an Olympic Summer sport](#)

Nikhilesh Bhattacharya. 2015, 44 p.

Postgraduate research grant programme 2015 Olympic Studies Centre, International Olympic Committee.

The evolution of field hockey as an Olympic Summer Sport in the inter-war years was marked by two contrasting developments. England, the home of modern hockey, made a solitary appearance in Antwerp in 1920 (where the matches were held in early September) and won gold but thereafter refused to play while the other constituent parts of Great Britain stayed away from Olympic hockey altogether. On the other hand, India, then a colony under British rule, aligned with countries on the Continent and joined the newly founded International Hockey Federation (FIH) to take part in the 1928 Amsterdam Games and, over the next decade, played a crucial role in keeping hockey within the Olympic fold. My project examines England's reluctance, and India's eagerness, in the light of developments that were taking place in the history of hockey, the Olympic Movement and the world at large. This is the first systematic study of the emergence of field hockey as a permanent Olympic Summer Sport (men's field hockey has been a part of every Olympic Games since 1928) as it covers five archives in two countries, various online databases and a host of secondary sources including official reports, and newspaper and magazine articles.

License to jump! : a story of women's ski jumping

Marit Stub Nybelius... [et al.]. Beijbom Books AB, 2015, 137 p.

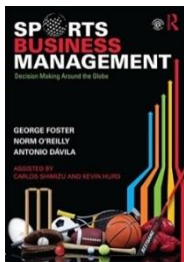

At the 2015 Nordic Ski World Championship in the Swedish resort Falun, the World Championship in women's ski jumping will be conducted. Women's ski jumping did not have a smooth way to become an internationally acknowledged and accepted sport. However, that struggle is no longer discussed. In many European countries women's ski jumping regularly gets TV coverage and the print media covers it in its sports sections. This book aims to give insight into the at least 150-year-history of women's ski jumping from its beginnings until it became an Olympic sport in the 2014 Sochi Games. It shows the struggle and effort of female ski jumpers, coaches, families and others to make this sport internationally recognized and accepted. The chapters reflect a collection of research done by international authors. Due to the accessibility of sources the main focus is on Europe and North America. However, we do not claim to offer a complete history; there are many histories of women's ski jumping, depending on the geographic location. We tried to avoid an overlapping of contents, which was not always possible, because each chapter was to be an entity in itself. In the future, still, bit by bit, little pieces have to be added to the puzzle to gain a complete picture of the evolution of this sport. Although all authors have an academic background in sport history and/or sport sociology and sport media, the book is aimed to appeal to the general public. For all those readers who are interested in more details, footnotes and references are added.

Management

Sports business management: decision making around the globe

George Foster, Norm O'Reilly and Antonio Dávila. Routledge, 2016, 512 p.

“Sports business management” will equip students with a comprehensive understanding of the sport industry. With a focus on management, strategy, marketing, and finance, the decision-making approach of the book emphasizes key concepts while translating them into practice. Foster, O’Reilly, and Dávila present a set of modular chapters supported with plenty of examples, mini-cases, and exercises to help students apply the decision-making approach to real-world situations. Covering an international array of sports and organizations, including the Olympic Games, FIFA World Cup, US Major League Baseball, and more. The book also covers unique topics such as diversity in sport, the impact of technology, and social media.

[The path to global sport sponsorship success: an event history analysis modeling approach](#)

Jonathan A. Jensen. 2015, 211 p.

Sport organizations rely on sponsorship as an important funding mechanism to finance its continued operations. Utilizing the lens of the relationship marketing literature, it is evident that the relationship between the sponsoring firm and a sponsored property is intended to be a long-term, mutually beneficial partnership. However, despite the importance of a sponsorship’s duration to both sides of the relationship, it is not well-understood whether certain factors or conditions can jeopardize these cooperative, business-to-business partnerships. Therefore, this study intended to further understanding of the relationship between sponsorship sellers and buyers by investigating factors that may predict the dissolution of such partnerships. From a theoretical standpoint, the study represents an important extension of the relationship marketing paradigm to better understand the dynamics of the sponsorship business-to-business relationship.

[Getting to the games: the Olympic selection drama\(s\) at the court of arbitration for sport](#)

Antoine Duval. IN: The international sports law journal, 29 April 2016, Ahead of print, 15 pages.

For many athletes around the world there is just one sporting competition that truly matters: the Olympic Games. Unfortunately, the available spots are scarce. In many sports it does not suffice to be second, you need to be the best amongst your countrymen. It is obvious that the decision to let someone go or not to the Games is a fruitful source of disputes. The present article focuses on the role of the Court of Arbitration for Sport (CAS) in resolving selection disputes. The ambition is to provide a practical guide for the disputes ahead and to showcase the CAS as a useful avenue to resolve them.

Sportsmanship: multidisciplinary perspectives

Tim Delaney. McFarland, 2016, 290 p.

Sportsmanship is a broad concept: ethics, fairness, honor and self-control. Some people find it difficult to define what makes a "good sport," but state "I know one when I see one." This collection of new essays brings together the work of more than two dozen contributors from around the world who teach sportsmanship in a range of academic disciplines including sociology, psychology, economics, education, kinesiology and applied athletics. Topics include the moral ambiguities of cheating; recreation in prison; ethics and character formation; coaching perspectives; gender; race; and the portrayal of sportsmanship in film.

Decision-making and appeals against resolutions of (sports) associations

Tony Schütz. Helbing Lichtenhahn, 2015, 271 p.

This book guides the reader through the basics of Swiss association law and decision-making, legal consequences and effects for improver decision-making related thereto. It illustrates the legal remedies available for incorrect decision-making (in particular, the actions of avoidance and for declaration of nullity of a resolution of an association that infringes the law or the statutes). Nullity and viability relate to the issue of the validity of a decision; both have the function of a sanction, having the aim of forcing sports governing bodies to comply with the rules set by statutes and law.

Media / Médias

[De Los Angeles à Helsinki \(1932-1952\): les quotidiens sportifs français devant l'Olympisme](#)

Tom Busseuil. 2015, 101 p.

Postgraduate research grant programme 2015 Olympic Studies Centre, International Olympic Committee.

L'étude vise à mettre en lumière le traitement médiatique du Mouvement olympique dans la presse sportive française, des Jeux de Los Angeles en 1932 aux Jeux d'Helsinki en 1952. Crise économique, montée des régimes totalitaires, Seconde Guerre mondiale, débuts de la Guerre froide au cours de ces deux décennies, les bouleversements internationaux ne manquent pas d'ébranler le monde sportif. Dès lors, la diffusion et la défense des valeurs et des idéaux olympiques dans la presse spécialisée revêtent un caractère crucial pour le Comité International Olympique. Sa crédibilité et la pérennité de son projet sont en jeu. Pour saisir les discours, l'examen des quotidiens sportifs L'Auto jusqu'en 1944 et L'Equipe à partir de 1946 est complété par l'exploitation des archives liées à l'Olympisme. En abordant conjointement l'histoire des médias sportifs et de celle du mouvement olympique, cette recherche doit informer sur la nature des ententes, des désaccords et des divergences qui rythment les relations entre ces deux protagonistes de la scène sportive.

Beyond the acronyms: sport diplomacy and the classification of the International Olympic Committee

Verity Postlethwaite, Jonathan Grix. IN: Diplomacy & statecraft, special issue: Diplomacy and sport, volume 27, issue 2, 2016, pp. 295-313.

This analysis contends that there is a need to interrogate fundamental components of modern diplomacy-with the actor being the focus-more specifically the classification of sports organisations in diplomacy. It is relevant as a more accurate understanding of sports organisations will contribute to how diplomatic studies can analyse and evaluate modern diplomacy within the context of sport. The International Olympic Committee is the actor used to illustrate how problematic classifications currently in the academic literature translate into weak and reduced analysis and evaluation of its role and significance in diplomacy.

The Olympics

Noah Berlatsky. Greenhaven Press, 2016, 87 p.

This title explores issues related to the Olympics. It covers benefits and harms from hosting the Olympics. It examines the issues of drugs and doping in the Olympics. It discusses environmental, political, and sex trafficking issues as they relate to the Olympics. It examines the Special Olympics. It also covers the readiness of Rio to host the Olympics in 2016.

Sport et mondialisation: points de vue du sud

Laurent Delcourt... [et al.]. Syllepse, 2016, 177 p.

Aux antipodes des valeurs de l'Olympisme, le sport est devenu un grand marché et une industrie extrêmement lucrative à l'échelle de la planète : 3% du commerce mondial, 650 milliards d'euros de chiffre d'affaires, 4 à 5% de croissance annuelle. Produit, reflet, voire accélérateur de la mondialisation, le sport-business lui imprime ses logiques marchandes, ses dynamiques clivantes et ses dérives mafieuses: financiarisation à outrance, privatisation et capitulation des pouvoirs publics, affairisme, corruption, concentration des revenus dans les mains d'un nombre limité d'opérateurs, distribution inégale des recettes et des performances sportives qui recoupe les écarts économiques existants.

[Nothing but medals?: attitudes towards the importance of Olympic success](#)

Jan Haut, Robert Prohl, Eike Emrich. IN: International review for the sociology of sport, volume 51, number 3, May 2016, pp. 332-348.

States intervene increasingly in financing and organization of Olympic elite sport in order to maximize national success in the medal table. Are those efforts reflected by a strong desire for medals within the population? Is national success regarded as so important that even critical measures are accepted? And would that indicate more general tendencies to nationalistic or authoritarian attitudes? These and other questions were addressed in a survey carried out in Germany in 2012. Results show that medals are indeed perceived as important, especially in lower educational levels, but by far not as important as sticking to sporting values and the rules of fair play. Multivariate analyses reveal that the desire for medal success is highly dependent on the belief in and perception of the Olympic competition.

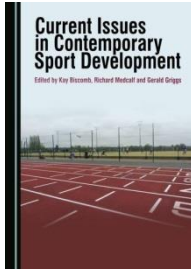

Sports in postcolonial worlds

Nicolas Bancel... [et al.]. Routledge, 2016, 138 p.

This book explores several cultural and historical paths intertwined in the genesis and development of sport and physical activities within colonial and postcolonial contexts. As far as youth organizations and Western-based sports are concerned, the Independencies political split needs to be reconsidered, from a cultural perspective with practices overlapping spatial, chronological and epistemological borders. When looking at the variety of practices, the colonial legacies and the ensuing migration journeys through a global perspective, there is a need to understand the diverse ways of composing and building the postcolonial sport worlds. Multiculturalism (South Africa, France, Algeria), transnational journeys (Pacific Islands), rebuilding of national identities through sporting institutions (Ireland, West Africa), racialization of the society (Rwanda, South Africa), gender control (from the West-East to the North-South gap), sportization of traditional/old games (Americas), and so on. Following the various studies shaping this book, the ambivalence of sporting and physical activities' paths comes up. It is apparent these trajectories have generated a mixed feeling of adhesion and repulsion towards Western hegemonies in postcolonial societies.

Current issues in contemporary sport development

Kay Biscomb... [et al.]. Cambridge Scholars Publishing, 2016, 165 p.

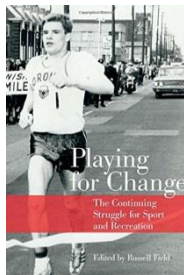

This collection of essays is the result of the debate and discussion at the European Sport Development Network's (ESDN) annual conference in 2014. ESDN's vision is to help create an environment where sports policies, programmes and practices are positively influenced by innovative, research-informed insight and collaborations between academics and practitioners. The chapters in this book closely reflect the remit and purpose of the ESDN in that they come from a variety of academics and sport practitioners.

Sporting boundaries, sporting events and commodification

Dikaia Chatziefstathiou... [et al.]. Inter-Disciplinary Press, 2015, 153 p.

Who benefits from sport? How does commodification drive sport development and meanings? What boundaries determine fan and participant? The contributors to this volume are interested in sport's social, political, and economic influences and roles, and show that the answers have many layers. Sport encompasses far more than the elite and professional levels that generate mass passions and large bank accounts, and impacts individuals in varying ways. The boundaries referred to in the title are thus not the typical, geospatial boundaries that define our world but the limits and possibilities that are attached to and derive from sport. The events that comprise sport and the commodification that attends to it shape those limits and possibilities, and create the understandings that define both what sport is and what we want it to be.

Playing for change: the continuing struggle for sport and recreation

Russell Field. University of Toronto Press, 2015, 467 p.

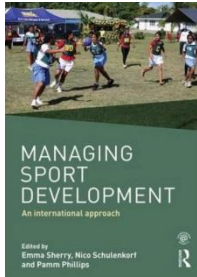

For more than forty years, scholars of the history and sociology of sport and recreation have studied how, no matter the time or place, sport is always more than just a game. In "Playing for change", leading scholars in the field of sports studies consider that legacy and forge ahead into the discipline's future. Through essays grouped around the themes of international and North American sport, including the Vancouver and Sochi Olympic Games; access to physical activity in Canadian communities; and the role of activism and the public intellectual in the delivery of sport, the contributors offer a comprehensive examination of the institutional structures of sport, physical activity, and recreation. This book provides wide-ranging examples of cutting-edge research in a vibrant and growing field.

[Collected insights from the field of sport: sustainability and legacy](#)

Geert Hendricks... [et al.]. AISTS, 2016, 1 vol.

This book from the AISTS (International Academy of Sports Science and Technology) is the second in the series 'Collected insights from the field of sports'. It concentrates on the two aforementioned challenges of sustainability and legacy in sport. The chapters in this book are derived from research papers that have been produced by the participants and visiting professors of the AISTS postgraduate programme, the AISTS MSA (Master of Advanced Studies in Sports Administration and Technology). Being grounded in research, the book aims to correct the imbalance between the sustainability and legacy theories and practices in the world of sport. Our intention is that its outcomes can be utilised by academics, sports administrators, sports teams, students and the public to engage in the discussion on sports sustainability and legacy.

Managing sport development: an international approach

Emma Sherry... [et al.]. Routledge, 2016, 190 p.

Sport development has become a significant part of the international sport industry. The development of sport (creating pathways for participation and talent development) and sport for development (using sport as a tool to achieve outcomes beyond sport) are now fundamental aspects of the organisation and governance of sport around the world. Consequently, any manager working in sport today needs to understand what sport development is and how sport development programs can be managed, implemented and evaluated. This is the first undergraduate textbook to offer a complete introduction to sport development, covering theory and its application to managerial practice, with examples from international contexts. The book integrates discussion of the development of sport and sport for development in every chapter, with international case studies to illustrate the significance and application of both.

[Human integration through Olympism education: a pragmatic engagement of youths in a war-torn society](#)

Samantha Nanayakkara. IN: Sport, education and society, volume 21, issue 4, 2016, special issue: Researching education within sport for development, pp. 623-643.

This paper delineates the findings of a mixed methods study that investigated how Olympism education could strengthen competencies of human integration through delivery of physical, social, and critical literacy and conflict resolution literacy. The study introduced a curriculum model integrating Olympism values and conflict resolution strategies for the purpose of facilitating human integration.

Positive youth development through sport

Nicholas L. Holt. Routledge, 2016, 244 p.

Cutting through the political rhetoric about the power of sport as a tool for social change and personal improvement, this book offers insight into how and why participating in sport can be good for children and young people. As the first text to focus on the role of sport in positive youth development (PYD), it brings together high-profile contributors from diverse disciplines to examine critically the ways in which sport can be used to promote youth development. Now in a fully updated, revised and expanded new edition, "Positive youth development through sport" covers a wider range of disciplines including sport psychology, development psychology, physical education, sport development and sport sociology. Its three main sections focus on: the theoretical and historical contexts of PYD, quantitative and qualitative methods for assessing PYD in sport, the potential of PYD in sport across different ages and abilities. With expanded guidance on how to apply positive youth development in practice, this is essential reading for all students, researchers, educators, practitioners and policy makers with an interest in youth sport.

MA 27796

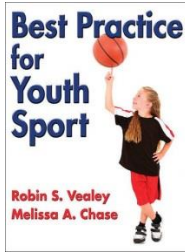

Re-designing youth sport: change the game

John McCarthy... [et al.]. Routledge, 2016, 178 p.

Many observers have pointed out what is wrong with youth sport: an emphasis on winning at all costs; parental over-involvement; high participation costs that exclude many families; lack of vigorous physical activity; lack of player engagement; and no focus on development. Currently, most attempts at righting the wrongs of youth sport have focused on coach education and curriculum, but in this book, the authors offer a different approach, one that involves changing the game itself. "Re-designing youth sport" combines vivid examples and case studies of innovative sport programs who are re-designing their sport with a comprehensive toolkit for practitioners on how to change their game for bigger and better outcomes.

MA 27749

Best practice for youth sport

Robin S. Vealey and Melissa A. Chase. Human Kinetics Publishers, 2016, 414 p.

In "Best practice for youth sport", readers will gain an appreciation of an array of issues regarding youth sport. The content is based on the principle of developmentally appropriate practice (DAP), which involves engaging in decisions, behaviors, and policies that meet the physical, psychological, and social needs of children and youth based on their ages and levels of maturity. This groundbreaking resource covers a breadth of topics, including bone development, burnout, gender and racial stereotypes, injuries, motor behavior and parental pressures.

The women's Olympics?: a gender analysis of NBC's coverage of the 2012 London Summer Games

Roxane Coche, C. A. Tuggle. IN: Electronic news, volume 10, number 2, June 2016, pp. 121-138.

This study examines NBC's U.S. prime-time broadcast coverage of the 2012 Summer Olympic Games for gender equality and compares that coverage to previous years. Olympic coverage is particularly important to female athletes because many receive little media attention beyond Olympic competition. The study found that, for the first time since 1996, NBC gave more airtime to women's sports than to men's sports. However, most of that coverage devoted to women's events was confined to "socially acceptable" sports.
