

Afghanistan: Conflict Induced Displacements (as of 14 August 2016)

Actual displacements between 1 January 2016 and 8 August 2016

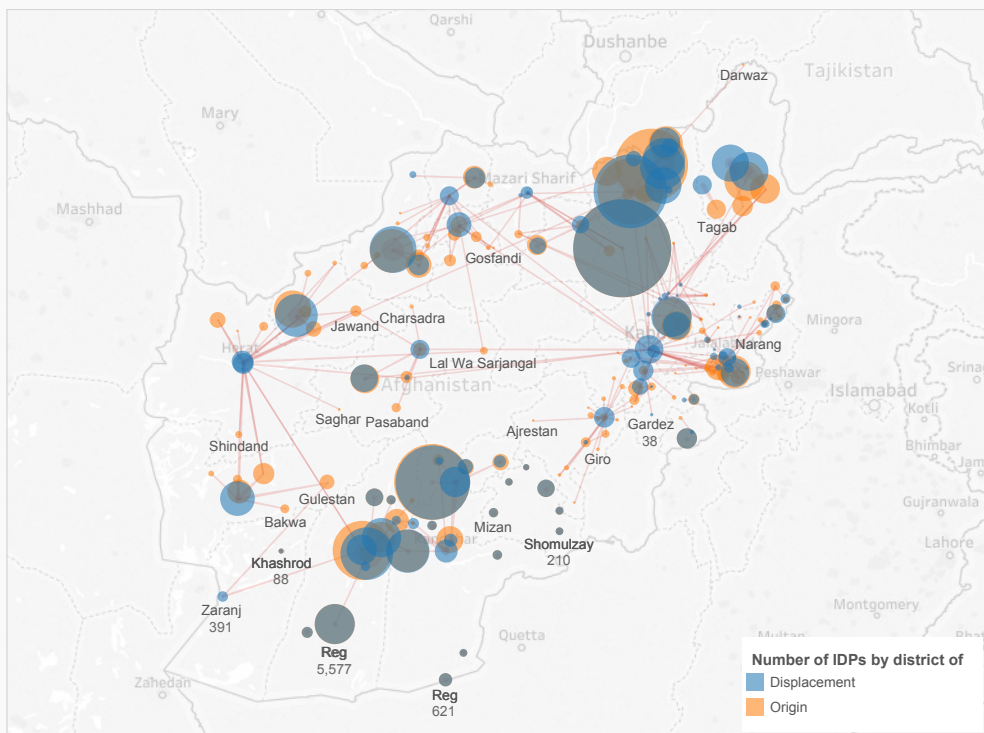

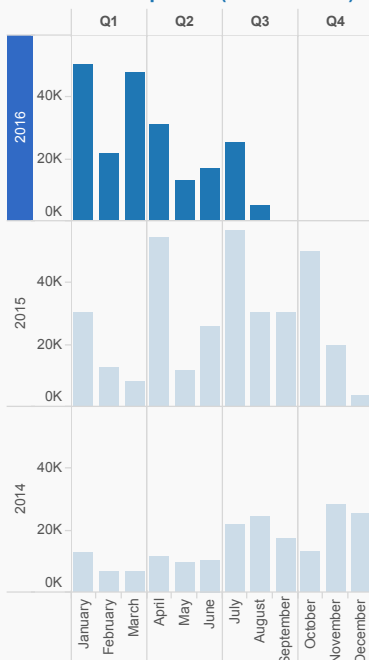

Between 1 January 2016 and 8 August 2016, 211,246 individuals fled their homes due to conflict. 29 of 34 provinces had recorded some level of forced displacement. Constrained humanitarian access hinders assessments, thus preventing verification of the full extent of displacement and undermining the provision of assistance and services. Displacement affects all individuals differently with needs, vulnerabilities and protection risks evolving over time due to exhaustion of coping mechanisms and only basic emergency assistance provided following initial displacement. Inadequate shelter, food insecurity, insufficient access to sanitation and health facilities, as well as a lack of protection, often result in precarious living conditions that jeopardises the well-being and dignity of affected families.

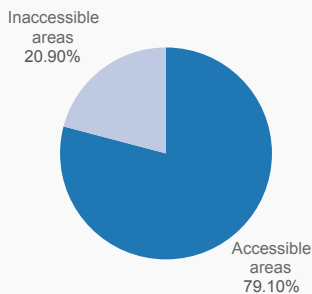

Time Period Past year

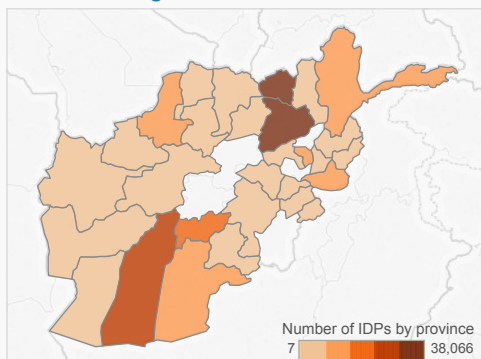

Individuals displaced (2014 to 2016)

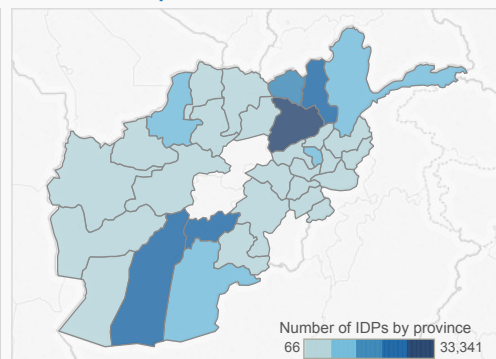

Percentage of IDPs within accessible and inaccessible areas (2016)

Province of origin

Province of displacement

Locations with displacements

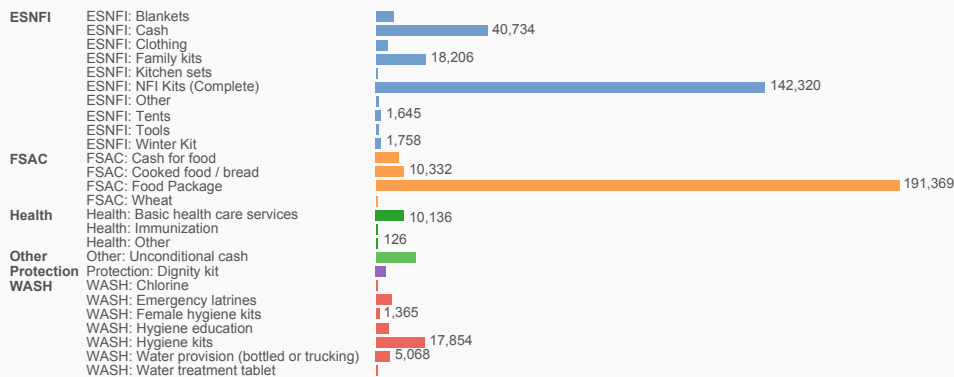

29 out of 34 provinces
155 out of 399 districts

Locations hosting IDPs

31 out of 34 provinces
98 out of 399 districts

Data source: Newly displaced population due to conflict 01 January 2016 to 08 August 2016, compiled by OCHA sub offices based on inter-agency assessment results. Assessments are ongoing in the field and these numbers are expected to change as new information becomes available. IDPs data for 2015 and earlier from IDP Task Force / UNHCR Population Movement Tracking System (PMT).

Summary of response (Individuals receiving assistance)
