Source: UNHCR and Partners Feedback: BENDALL@unhcr.org For further information visit the UNHCR South Sudan Portal: [data.unhcr.org/SouthSudan](https://data.unhcr.org/SouthSudan)

This Indicator Report provides a monthly snapshot of the regional response to the South Sudan Situation. The indicators included report on the Post 15 December 2013 South Sudan caseload only. The report is prepared through collaboration with the reporting country and the Regional Support Hub, Nairobi.

The notes below provide further contextual information on various sector indicators:

**POPULATION**

Due to limited access by UNHCR and partners in the most affected areas in Blue Nile, White Nile and South and West Khordofan states, estimates provided are collations of various Government of Sudan agencies (Humanitarian Aid Commission, HAC, and Commission of Voluntary and Humanitarian Work, CVHW), local partners (Sudanese Red Crescent Society, SRCS, AORD, and ASSIST) and IOM. HAC and SRCS provide new arrivals estimates from border points mainly at Joda, Al Kueik, Gedeid and El Leri.

**CHILD PROTECTION**

Child specific information and services are only available for the White Nile camps where over 60% of refugees have undergone standard UNHCR Level 1 registration and basic camp facilities have been developed. Preliminary data for separated/unaccompanied children is now available for Andalus and Shagara open areas following the Level 1 registration. More data will be available as the population settles. For the rest of the locations, information will be available once some forms of registration are conducted and enhanced UNHCR and partners' presence is secured. BIAs and BIDs have not yet to be conducted in most locations partly because of limited access to the areas. UNHCR is working on partnerships with the Ministry of Social Welfare, MOSW, so as to ensure that BIAs and BIDs assessments are conducted and targeted assistance is provided.

**EDUCATION**

Education figures for pre-primary and secondary school enrollement are unavailable in all locations. The number of children enrolled in primary schools is available for the settlements in the White Nile (Jory, Alagaya, Al-Redes and Al-Kashafa). The figures are based on reports from SRCS. A noticeable reduction in the number of children going to primary school was noted in January. This coupled with the sharp increase in the total of number of children has led to a significant reduction of the Gross Enrollment Rate, GER. The GER is calculated by obtaining the percentage of the yield of the total number of children enrolled in primary school divided by the number of children in the age cohort of 5-11. The more accurate representation of the age of primary school going children in Sudan (6-13 years) is not available until individual registration is conducted.

**SEXUAL AND GENDER BASED VIOLENCE**

Information on SGBV in CoO, transit and CoA is yet to be systematically collected. This may be attributed to the sensitivity of the subject in these area.
