Jordan Response Plan 2017-19
Guidelines for Refugee and Resilience Categorization

Each PSS needs to be labelled with a specific and unique ID#. The ID# should specify if the PSS belongs to the (REF) refugee or (RES) resilience component of the JRP.

The following decision tree was developed to assist TFs with the categorization of their PSSs. We expect that sequentially answering the below set of questions should resolve the issue of categorization for the majority of projects. If the categorization is still ambiguous after completing the tree, contact the JRPSC Secretariat.

Please start by answering the first question below about the PSS to be categorized. A "yes" answer will lead to a bubble on the left with the correct category for the project. A "no" answer will lead to a box on the right with the next question. Complete as many questions as needed until led to a bubble with a category.
