

# WASH Sector Working Group

Corrie Kramer,  
UNICEF Emergency WASH Specialist

# 2017 Achievements- Water Supply

AVERAGE DAILY WATER SUPPLY, GAMBELLA CAMPS 2017, IN MILLION LITRES

Av. 5 Million liters daily

**20 l/p/d Target**

17 l/p/d Achieved

85%

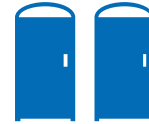

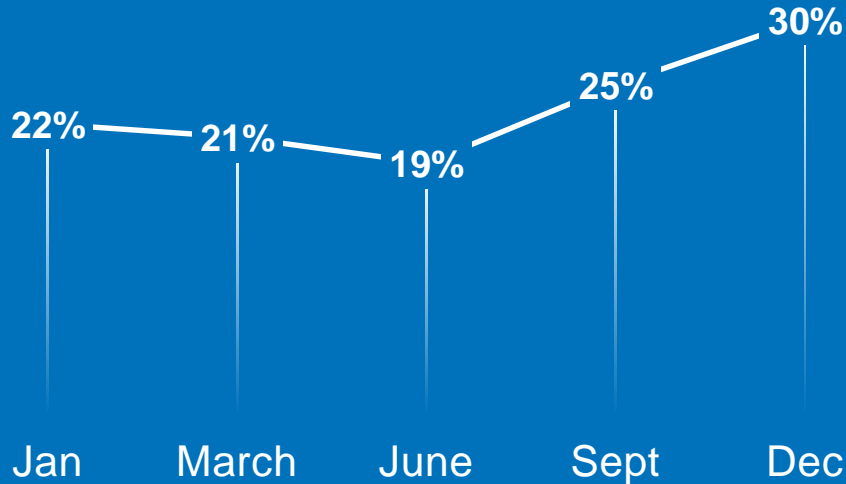

Av. 701,666 liters daily

# 2017 Achievements- Sanitation & Hygiene

AVERAGE HH LATRINE COVERAGE  
TREND, GAMBELLA 2017

**1636 Communal latrines**  
**12,187 HH latrines**

**85% RRP Target**  
**30% Achieved**  
**35.3%**

**250,000 Planned**  
**365,373 Reached**  
**146%**

# Challenges

High cost of water production

- Technology & design choice
- Water management practices

Low investment in sanitation sub-sector

Lack of community participation in managing WASH services

# WASH Priorities 2018

Provision of safe drinking water

- Emergency water supply →
- Permanent water systems

Construction of emergency latrines

- Emergency latrines →
- Shared HH latrines

Dissemination of key hygiene and environmental sanitation messages

Community engagement to manage WASH services

# Strategic Priorities in Water supply

- Minimizing operational inefficiencies and reduction in unit cost of water
  - Optimization of water schemes designs- water safety planning;
  - Solarization and national grid electricity connections;
  - Community based management model- to start in 2018;
  - Water flow metering
- Piloting utility model & develop linkages with Regional water bureaus;
- Strengthening coordination to leverage on emerging initiatives
  - RDPP, BSF, One WASH, Other govt initiatives

# Strategic Priorities in Sanitation & Hygiene

- **Sanitation mapping and construction**
  - Establish actual gaps, opportunities for community sharing of infrastructure, zoning appropriate infrastructure options etc.;
  - Encouraging culture of sharing, build stronger communities
  - Integration with Shelter sector, partners to constructing shelter constructs latrines (economy of scale, reduced sanitation over head costs) – proposed but not started
  - CBI – Jewi (NCA) & Nguenyyiel (Oxfam) piloted
- **Strengthen and scale community based management model;**
  - HH participation in latrine construction
  - Use of YEP graduates (where available) to support sanitation marketing and construction
- **Support ongoing operation innovation**
  - UDDTs
  - CBIs
  - Water Safety plans for Itang
- **Support and strengthen linkages with regional authorities on sanitation & hygiene services**
  - Construction of sanitary land fills, sludge drying bed for UDDT products

**Thank you!**
