

Reproductive Health Campaign Azraq Camp

January 22nd – March 20th 2017

By: Community Health Officer
March 22nd 2017

Background

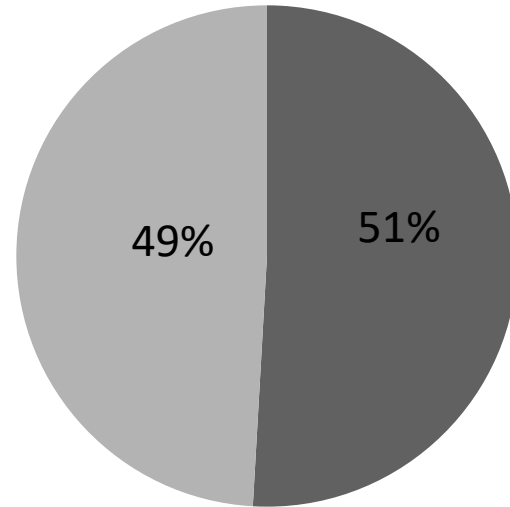

35,000

58%

Male

Female

Objectives

- Increase male participation and involvement in RH and encourage couple counseling
- Increase awareness on Reproductive Health services available in IMC PHC Facilities (highlighting the importance of ANC/PNC visits, TT vaccination and Family Planning)
- Highlight medical, psychological, social and economic consequences associated with poor Family Planning
- Correct misconceptions associated with Family Planning methods
- Emphasize benefits for delaying early childbearing among adolescents

Methodology

Training Sessions

Visits

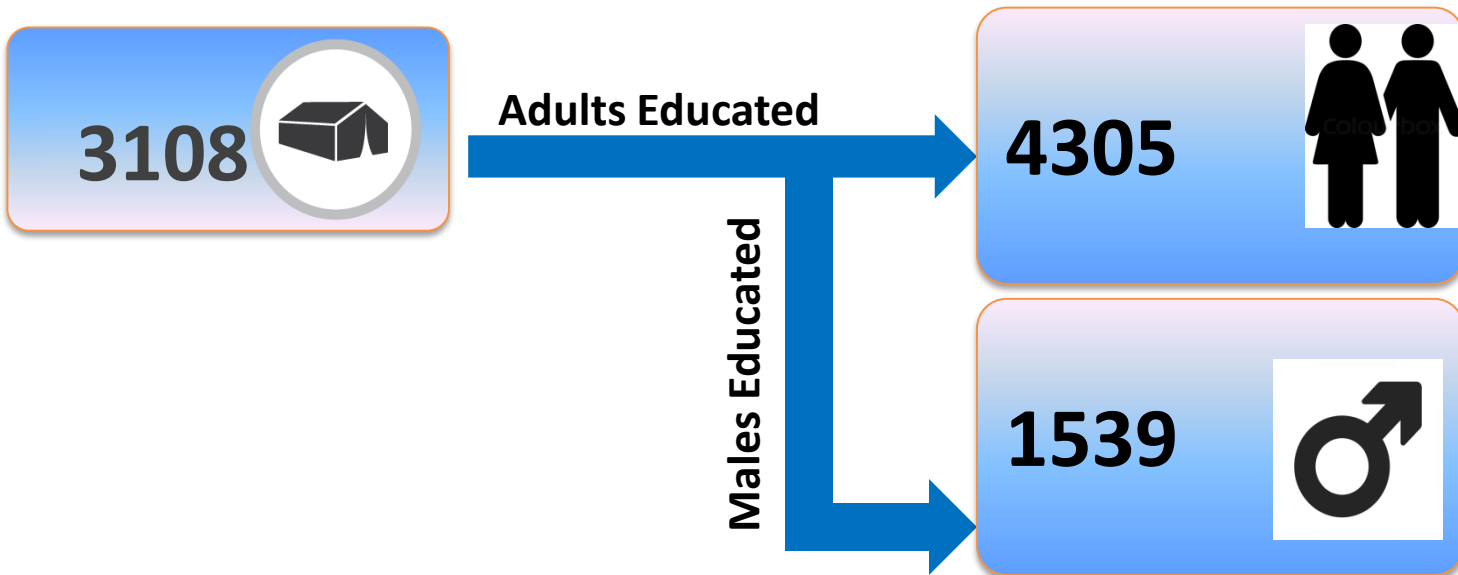

Events

27/2/2017	Makani 3	Non-married Men	25

Challenges

- Male Gynecologist
- # of children per Household
- Couple counseling
- Accessibility

Challenges

- Misconceptions about FP methods
- Religious (Minimal effect)
- Follow up on identified cases
- Lack of awareness/ education level

Lessons Learned

- Continuous efforts
- Follow up
- Documentation (follow up & card #)
- Events (targeted & focused)
- Coordination (PHC)

Thank you
