

# UPDATE: AL AZRAQ REFUGEE CAMP, AZ ZARQA GOVERNORATE, JORDAN

Analysis with QuickBird-2 Data Acquired 21 July 2013 and 16 June 2013

This map illustrates the refugee camp currently under construction in Al Azraq, Jordan and updates the previous UNOSAT analysis done using an image from 16 June 2013. As of 21 July 2013 a total of 1,574 infrastructure and support buildings were detected in the camp and preparations are continuing to accommodate incoming refugees. The previous analysis done by UNOSAT detected no such structures. Paved and unpaved roads

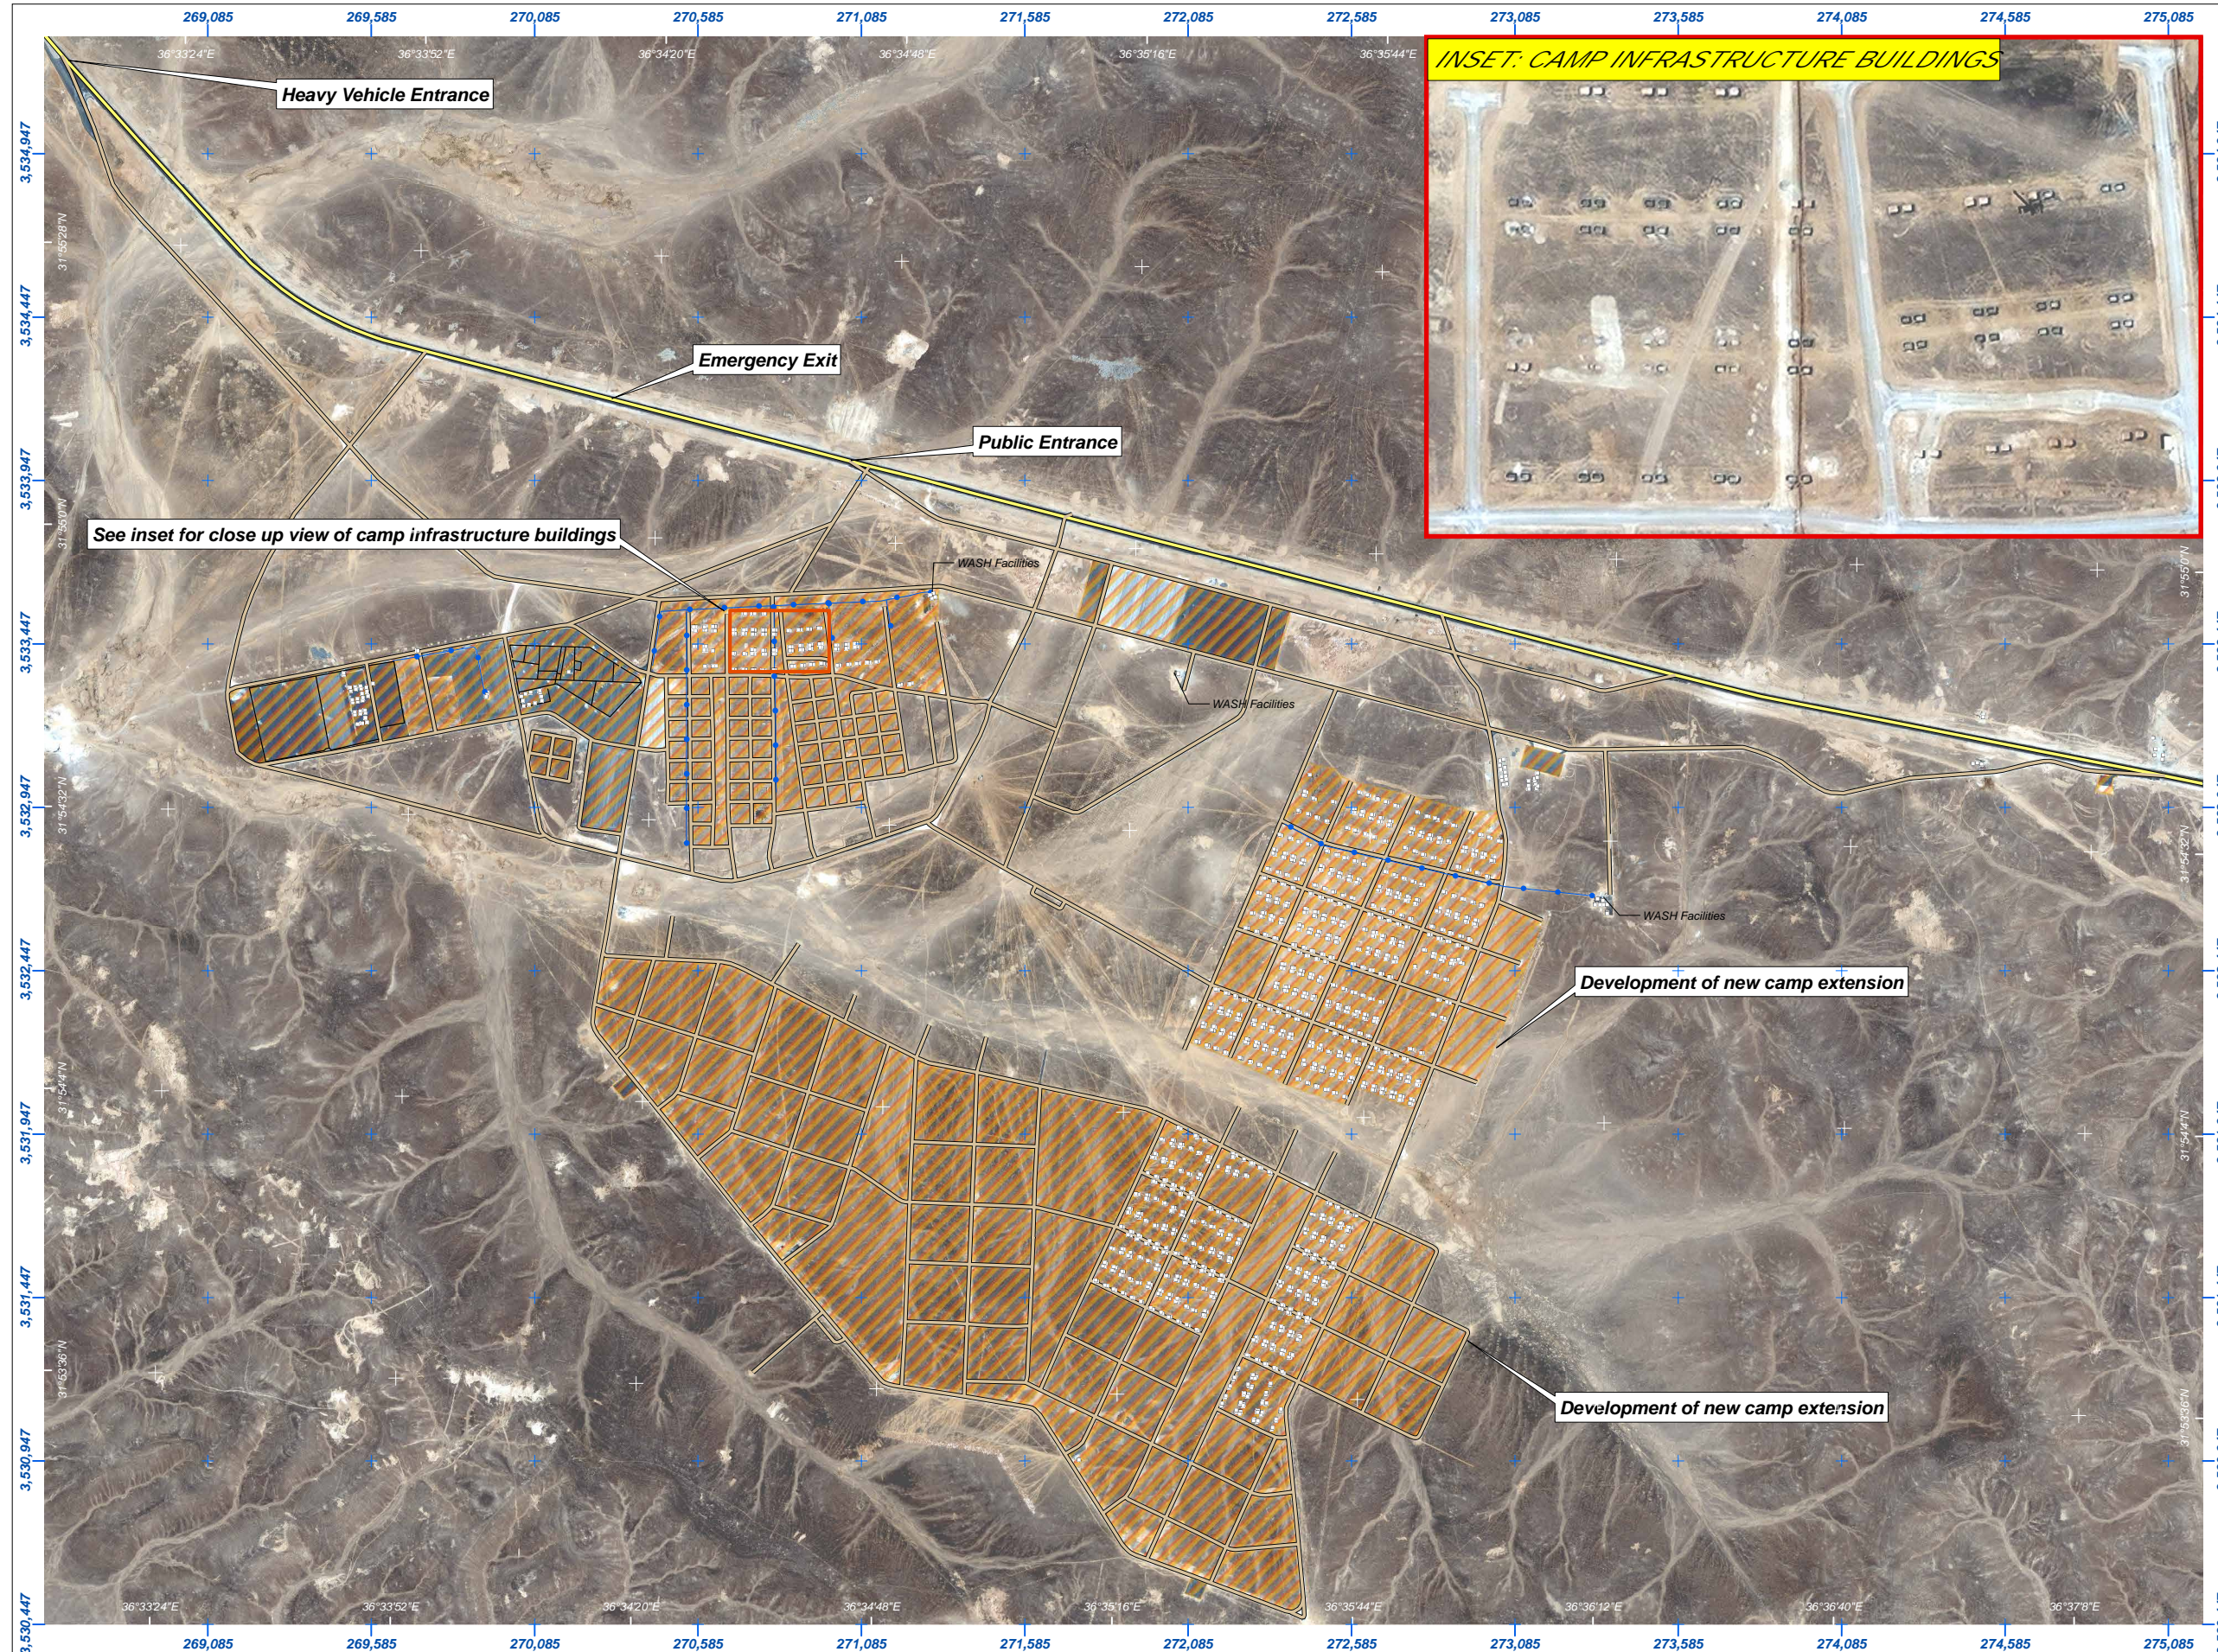

have likewise increased significantly and define the transportation network in and around the camp. Water and sanitation services are also under development in multiple camp zones suitable for supporting thousands of proximate shelters. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.
