The PRMN (Protection & Return Monitoring Network) is a UNHCR-led project which identifies and reports on displacements (including returns) of populations in Somalia. The network also identifies and reports on protection risks and incidents underlying such movements. Only figures collected by PRMN are reported above. Not all displacements in Somalia are captured. Verification of reports from the field is a continuous process and may result in adjustments to figures reported in previous months.

This should be read in conjunction with the [Notes on PRMN Methodology](https://goo.gl/9uP6MJ) (https://goo.gl/9uP6MJ) which outline the approach and limitations.
