

INDIVIDUALS AT HADALAT BORDER CROSSING, JORDAN-SYRIA BORDER

Analysis with WorldView-2 Data Acquired 2 December 2014 & WorldView-1 Data Acquired 8 November 2010

This map illustrates satellite-detected displaced persons shelters in the area of the Hadalat crossing on the Syrian / Jordanian border. Using a satellite image collected by the WorldView-2 satellite on 2 December 2014, UNOSAT located 95 probable shelters in the open desert and along the Syrian side of the border about 107 kilometres southwest

of Iraq border. Due to the very small size and irregularity of the shelters it is likely that some shelters may have been missed in this analysis, or some shelter were included erroneously. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.

Complex Emergency
