

HIGHLIGHTS

- Large number of partners from the beginning of the response for cyclone Idai have reached some 67% of the estimated people in need with emergency shelter, transitional shelter and NFIs within the first 3 months of the response.
- Linkage to early recovery made early on providing coordination and technical guidance to actors involved in providing more durable transitional or permanent shelter solutions. Recovery SC meetings held at the Ministry of Public Works and then the newly established government's office for reconstruction (GREPOC) in Beira. Coordination of recovery and reconstruction activities will be handed to GREPOC by May 2020.
- In parallel the Shelter Cluster continues to coordinate emergency response to New floods/heavy rains that affected people in larger areas in the central region in the beginning of 2020.

COVERAGE AGAINST TARGETS

NEED ANALYSIS

After cyclone Idai's second landfall in Mozambique on March 15th 2019, an estimated total of 660,000 people (approx. 132K HHs) across Sofala, Manica and Zambesia provinces had lost their house and livelihood and were in urgent need of emergency shelter assistance. Although some 445k (approx. 90k HH) people were reached with shelter assistance by July, an estimated total of 560,0000 people (approximately 112,000 HH in provinces affected by Idai) were still in urgent need of shelter assistance and unable to self-recover, mostly in rural areas, where the majority of families who relied on subsistence agriculture, have lost their livelihoods and main source of food, and facing competing priorities. This includes additional caseloads areas that were not assessed initially. The overall number of people in need of shelter assistance after cyclone Idai, amounts to around 1M (approximately 200K HHs).

In January and February 2020, new floods & heavy rains affected over 70K people in the central region provinces of Manica, Sofala and Zambezia. Agencies used all their stocks and supplies to provide minimum response to approximately 4K people leaving still a large gap from the new flood/heavy rains and cyclone Idai of approximately 300K people.

RESPONSE

Since the beginning of the response (March 2019) until the end of February 2020, Shelter Cluster partners have provided shelter support to 750K people (approximately 150K HHs) and NFI support to 180K (approximately 37K HHs) in the provinces of Sofala, Manica and Zambezia.

GAPS / CHALLENGES

Cluster partners across the affected areas in Sofala, Manica and Zambézia provinces lack resources to address the wider shelter needs with a current gap of 250K people (approximately 50K HHs) that still need to be reached.
