

## LOOKING BEYOND THE EMERGENCY TOWARD DEVELOPMENT

### Population movements and security situation

The Diffa region has been hosting Nigerian refugees fleeing terrorist violence in the northern states of Nigeria since 2013. With the first attacks on Niger territory early 2015 the situation has deteriorated dramatically. In May 2015, the authorities decided to evacuate the population of the Niger region of the Lake Chad Islands.

Following the first attacks in the Diffa region, the population on the move has become increasingly mixed. The majority of the displaced are settled in more than **140 spontaneous sites, villages and towns** along the one main road in the region, the **Route Nationale 1**. At the request of the authorities, UNHCR has established two camps: the refugee camp of Sayam Forage and the IDP camp of Kabellewa. The latter was closed by the Government in June 2017 after a suicide bomb attack.

The security situation has serious negative effects on the economy of the region, reducing the absorption capacity of the host population and the capacity of the displaced population to support itself. The population of the fertile areas (Lake Chad, Komadougou river) have been displaced, the pastoral routes have been destroyed, and cross-border exchange and trade (seasonal migration, trade of goods) are deeply affected. Despite a significant increase in humanitarian interventions, the needs are still high. Already weak before the crisis, basic services and infrastructure (water, health, and education) are increasingly under pressure.

and highly dependent on humanitarian actors. The border with Nigeria has been closed in August 2019 which increase the price of essential goods for population. Since April 2019, movements are restricted on the Gueskerou, Toumour, Bosso axis following the discovery of explosive devices, successive attacks and kidnappings. In 2020, attacks against the population with multiple kidnappings, the trademark of Boko Haram, continue as threats towards humanitarian workers.

### Evolution of Protection incidents in the Diffa region from Jan 2019 to May 2020

In April 2020, reported protection incidents decreased following the four weeks interruption of telephone lines in Bosso and N'Guigmi departments during the Chadian army's operation, "The Wrath of Bahoma".

In May 2020, the region particularly deplored 3 deadly armed incursions by armed groups and 14 fires in Diffa, N'Guigmi and Toumour.

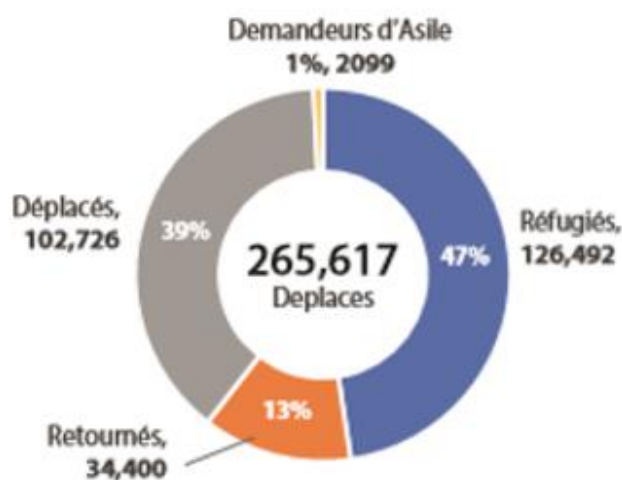

## Population Statistics

As of **June 2020**, UNHCR registered biometrically 224,416 displaced people in the region (66,811 household), including 125,754 Nigerian refugees, 65,769 IDPs, 30,797 returnees (Niger nationals who had migrated but returned to Niger) and 2,097 asylum seekers. The population of the Sayam Forage camp is 18,016 individuals.

In March 2020, UNHCR carried out BIMS registration for the unregistered displaced population, including refugees, IDPs and returnees in N'Guigmi commune. The exercise had to stop at the end of the month because of the security and the COVID-19 pandemic.

The latest figures published by the government in May 2020 estimate **265,617** displaced persons.

### Government figures as of 4<sup>th</sup> May 2020

## Operation Strategy

The key pillars of the UNHCR strategy for the Diffa region are:

- **Ensure institutional resilience** through capacity development and support to the authorities (locally elected and administrative authorities) in the framework of the Niger decentralisation process;
- **Strengthen the out of camp policy** around the urbanisation program through sustainable interventions and dynamic partnerships including with the World Bank;
- Ensure a coordinated and high-quality **protection response** and maintain an **emergency response** capacity.

## Main Milestones

- **Protection response:** Protection actors have improved their coordination and the quality of the response, through better involvement of the community and creation of a more effective referral mechanism. Since January 2020, more than 3,600 refugees from Chad and Nigeria have crossed the Lake Chad island and have found safety in Kindjandi, where UNHCR provides emergency response. The city of Diffa currently hosts more than 23,000 displaced persons.
- **Urbanisation program:** This innovative program simultaneously ensures legal access to land for social housing for refugees and vulnerable host households, while revitalising the local economy which has been deeply affected by the Boko Haram conflict in the region. In 2017, UNHCR, with the support of the European Union Emergency Trust Fund for Africa (EUTF), scaled up the intervention in 7 districts (Diffa, Assaga, Chetimari, Maine Soroa, Toumour, Kablewa and N'Guigmi). The aim is to provide 6,000 land parcels, to construct 3,600 “social houses” for the most vulnerable, create entrepreneurship and employment, support local authorities in managing urban development and strengthening the public water provision. To date, 1,689 sustainable houses for the most vulnerable families have already been built, 3,419 jobs were created, 2,394 persons were trained in the construction and more than 36,900 persons got a better access to water in 3 districts (Diffa, Assaga and Chetimari).

*A hybrid water pumping station built in Assaga. More than 16,000 Nigerien and refugees have access to drinking water thanks to 5 water fountains powered by 28 solar panels and 1 generator.*

*Didje Sani works on the block production site in Diffa. 3,4% of the construction teams employees are women.*

**Livelihood Activities:** With the University of Diffa and partner APBE, UNHCR set up an agricultural center inside the Sayam Forage refugee camp. So far, 125 refugees, returned and host families have been trained and practice market gardening and fish farming activities, maintaining 52 ponds.

*Tilapia and catfishes are cultivated in the 1,5 Ha site.*

*To reduce wood consumption, women make banco fireplaces.*

- **Combating desertification and protecting the environment:** Refugees and host populations are actively taking part in the protection of the environment. Fixing sand dunes to protect agricultural crops has been initiated in two villages. Five garden centers have also been established in Sayam Forage for reforestation and 100 persons have been trained to produce briquettes from biodegradable waste.
- **Prevention and response to the COVID-19 pandemic:** In partnership with the NGO APBE and “Bien-être de la Femme Rurale”, 60 women have been trained and equipped to produce and commercialize soap since 2017. As part of the national response, refugees scaled up the production and soap are distributed within the Sayam Forage camp. Through this activity, each woman earns 15,000 FCFA per month. UNHCR carried out mass awareness raising campaigns, set-up hand washing facilities in all refugee hosting areas and donated medical supplies and equipment to the local authorities. To isolate and treat COVID-19 patients of the whole region, UNHCR rehabilitated a building identified by health authorities.
- **Distance Education Centres:** UNHCR established with partner COOPI a Distance Education Programme for Nigerian junior and senior secondary school students in 2015 allowing young refugees to follow the official Nigeria curriculum while they are in Niger and take their exams. 5 education centers have been equipped in Diffa, Bosso, Kablewa, Maine Soroa and Sayam Forage camp where students take online lessons with latest technology followed by 39 teachers and 5 tutors. Since 2016, 332 youth (281 boys, 51 girls) have been registered for the exams with 64% of success. 548 students are currently enrolled in the 5 education centers.

## Main Challenges

- The hosting areas are generally poorly equipped. Structural but costly infrastructural investments in irrigation, water supply and electricity are required to enable the population to develop income generating activities;
- The Niger public services are highly dependent on humanitarian actors, which creates a risk of a sharp deterioration in living conditions for the population in case of a funding shortfall;
- Irregular access for humanitarian actors due to the security situation and military operation;
- A worsening security situation generates new major displacements and secondary movements; possible movements of Nigerian refugees back towards Nigeria might also occur.

## Donors

### Special thanks to:

### **DONORS WHO HAVE PROVIDED CONTRIBUTIONS TO UNHCR OPERATIONS IN THE DIFFA REGION IN NIGER (2020)**

CERF | European Union | United States of America | Private donors | Peacebuilding Fund | Spain
