

Collection of Accommodation and Transportation Information

Examples

April 2020

There are many ways in how to collect information on accommodation and transportation requirements of each team. We acknowledge that every organiser has its own preferred way in collecting all necessary information but would like to give examples and guidance for an effective collection of the data.

- The forms (either online of offline) should be clear and straight forward to complete
- We recommend that teams identify number of double and single rooms needed, rather than an automatic allocation based on total team number
- Special focus shall lie on the demand of accessible rooms of each team
- Information on number of wax cabins can be included

For any questions, please do not hesitate to contact info@WorldParaNordicSkiing.com
