TRAINING OVERVIEW

The aim of the CCCM training is to bring together partners in the CCCM sector to develop shared understanding of roles and responsibilities of the Camp Management Agency, Camp Coordination Agency and Camp Authorities in camps and collective centers.

The training aims to raise awareness of international protection and assistance principles, approaches and standards, and build competence in using CCCM guidelines and tools.

The CCCM training participants shall be able to identify the CCCM activities in each phase of the Camp Life Cycle and recognize how seeking of durable solutions relates to them.

The CCCM training materials are always tailored to the learners' needs (humanitarian staff, national authorities, community leaders, camp committees) and cover the following aspects:

- Introduction to CCCM (core)
- Humanitarian Reform and the Transformative Agenda
- Roles and Responsibilities in camp and collective centres' response (core)
- Principles and Approaches (core)
- Camp Coordination (core)
- Standards & Settlement Design (core)
- Care and Maintenance
- Camp Closure
- Information Management (core)
- Participation and community mobilization (core)
- Safety and security in camps

The training modules serve as a flexible framework for three-day training. They can be run in sequence, or adapted for different purposes. Depending on the context, not all the modules need to be used for the training, but there are core modules that must be included. The focus of the training should be tailored to fit the needs of both the context and the participants at the time of training.

The full presence of all participants is absolutely required throughout the training.

The CCCM modules were developed for IDP operations, and can be adapted to cover any of the following situations:

- Natural disasters or conflict-affected areas
- Disaster response or preparedness
- Emergency or protracted scenario
- At any stage of the camp life cycle (set up; care and maintenance; closure)
- For all type of camps or camp-like setting (planned camps, collective centers, self-settled camps)
- Regional, national and local needs at camp level
