## Housing requirements by municipality for on-going minority returns for the year 2001

**Explanatory notes:**

(1) The figures for the on-going reconstruction are a compilation of inputs from UNHCR field offices and OHR. They include housing completed since January 2000 and on-going housing reconstruction and repairs. (Major donors: Denmark, EC, Netherlands, Norway, Sweden, Switzerland, USA).

(2) The housing needs for each municipality include totally destroyed housing units (requiring complete reconstruction) and damaged housing units (requiring major repairs).

(3) Total Housing Reconstruction needs (26,536) are composed of those who have returned and registered in 1999, 2000 and the first 5 months of 2001, those who have returned but have not yet registered and those who are in the return process ("house cleaning" and "overnighting").

\* Total on-going reconstruction figures for 2001 include carry over of not completed reconstruction of housing units from 2000, and new reconstruction projects initiated during the first 5 months of 2001.

\*\* Above figures do not include recent pledges still pending implementation.
