

# VOLREP AND BORDER MONITORING MONTHLY UPDATE

From the start of UNHCR's assisted voluntary repatriation operation in March 2002 to the end of July 2014, over 5.8 million Afghan refugees have returned home, out of which over 4.7 million repatriated with assistance from the Ministry of Refugees and (MoRR) Repatriation and Today, about a UNHCR. of Afghanistan's quarter population consists of return-

ees.

#### UNHCR AFGHANISTAN

JULY 2014

#### VOLUNTARY RETURN TO AFGHANISTAN

1 – 31 July 2014: In July 2014, a total of 701 Afghan refugees voluntarily repatriated to Afghanistan. Of this, 359 came from Iran, 329 from Pakistan, 12 from India and 1 from Tajikistan. The volrep process was temporarily stopped (between 27 - 29 July 14) due to Eid holidays.

1 January – 31 July 2014: During the first seven months of 2014, a total of 10,055 Afghan refugees (averaging 47 individuals/day) voluntarily repatriated to Afghanistan. The rate of return so far this year shows a sharp decrease (65%) compared to the 28,800 Afghans who returned during the same period in 2013.

| Year  | Returns from<br>Pakistan | Returns<br>from Iran | Returns from Other<br>countries | Total     |
|-------|--------------------------|----------------------|---------------------------------|-----------|
| 2002  | 1,565,066                | 259,792              | 9,679                           | 1,834,537 |
| 2003  | 332,183                  | 142,280              | 1,176                           | 475,639   |
| 2004  | 383,321                  | 377,151              | 650                             | 761,122   |
| 2005  | 449,391                  | 63,559               | 1,140                           | 514,090   |
| 2006  | 133,338                  | 5,264                | 1,202                           | 139,804   |
| 2007  | 357,635                  | 7,054                | 721                             | 365,410   |
| 2008  | 274,200                  | 3,656                | 628                             | 278,484   |
| 2009  | 48,320                   | 6,028                | 204                             | 54,552    |
| 2010  | 104,331                  | 8,487                | 150                             | 112,968   |
| 2011  | 48,998                   | 18,851               | 113                             | 67,962    |
| 2012  | 79,435                   | 15,035               | 86                              | 94,556    |
| 2013  | 30,388                   | 8,247                | 131                             | 38,766    |
| 2014  | 7,168                    | 2,741                | 146                             | 10,055    |
| Total | 3,813,774                | 918,145              | 16,026                          | 4,747,945 |

The lower rate of return so far this year is believed to be attributed to the extension of Proof of Registration (PoR) cards until 31 December 2015 in Pakistan, uncertainty regarding the Afghan elections, and concerns about security during the transitional period.

Overall return trends is depending on socio-economic and political developments in Afghanistan, Pakistan and Iran. It is also assumed that the result of this year election will impact decision making among Afghan refugees in Pakistan and Iran for return. In addition, limited absorption capacity to gather with limited access to basic services, lack of livelihood opportunities, lack of shelter and land could be other obstacles which may discourage Afghans to make a decision for return.

Difficult economic conditions, deteriorating security conditions (in Pakistan) alleged harassment by authorities and fear of arrest and deportation constituted key push factors in the decision to return so far this year. On a more positive note, improved security in some parts of Afghanistan, the Government land allocation scheme and/or UNHCR shelter program, improved

employment opportunities in Afghanistan, UNHCR's assistance package and reunion with the family/relatives in Afghanistan were cited by many returnees as important pull factors in their decision to return.

#### **RETURN PROCESS**

A refugee wishing to return to Afghanistan with the assistance of UNHCR must approach UNHCR's Voluntary Repatriation Centres (VRCs) in the country of asylum to register for return and sign a Voluntary Repatriation Form (VRF).

Repatriation from Pakistan is facilitated through two VRCs: Chamkani located in Peshawar, Khyber Pakhtonkhuwa and Baleli located in Quetta, Baluchistan. Repatriation from Iran is facilitated through Soleimankhani, Esfahan, Shiraz, and Mashhad VRCs, the Sub -Offices, or directly through the Border Crossing Station (BCS) at Dogharoun.

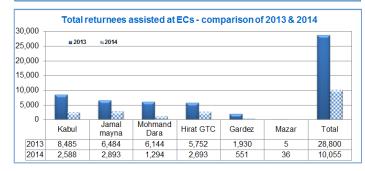

Upon return to Afghanistan, returnees are assisted at five encashment centres (ECs): Mohmand Dara (Nangarhar), Kabul (Kabul), Gardez (Paktya), Jamal Mayna (Kandahar) and Herat (Herat).

At the ECs, depending on the province of origin, all Afghan returnees with VRFs received approximately US\$ 200 per person (between US\$30 - US\$70 for transport and US\$150 as a short-term assistance grant). The transportation grant varies according to the distance from the areas of asylum to the areas of origin. Returning refugees are also briefed on mine awareness and education procedures in Afghanistan at the EC. They can benefit from transit facilities for overnight stay and basic health services. All children under the age of five are vaccinated for polio and measles. Returnees are briefed also on how to access legal aid, if required.

In view of rising commodities and transportations costs in Afghanistan, UNHCR, in 2014, increased the cash grant from US\$ 150 1 to US\$ 200 per person.

#### Assisted returns by region of destination in Afghanistan 2014 & 2013

# ENCASHMENT CENTRE RETURNEE MONITORING

Between 1 January and 31 July 2014, a total of 1,191 interviews were conducted with returning refugees from Pakistan (940) and Iran (251). Interviewees were selected in two ways: at random (1,125) and from those with obvious protection concerns (66) at the first point of contact in Afghanistan, the UNHCR Transit/Encashment Centres in Kabul, Jalalabad (Mohmand Dara), Kandahar (Jamal Mayna), Gardez and Herat (GTC). This monitoring exercise helps UNHCR to identify return trends, push/pull factors and check on the level of information returnees received to make an informed choice to return home.

# **RETURNS FROM PAKISTAN**

| <ul> <li>During Jan and Jul, a total of 940 interviews were conducted at ECs with newly arrived returnees. Among these, 63% were Male and 37% were Female, of whom:</li> <li>2% were minors (12 to 17 years old)</li> <li>88% between age of 18 and 59</li> <li>10% were elderly (60+ years)</li> <li>Ethnicity: 74% Pashtun, 12% Tajik, 7% Uzbek, 3% Hazara, 2% Turkmen and 2% other.</li> </ul> | <ul> <li>Years in exile:</li> <li>71 % left Afghanistan during Communist regime</li> <li>11 % during Taliban regime</li> <li>8 % stated they were born in Pakistan</li> <li>6 % during Mujahideen period</li> <li>4 % during Transitional government</li> </ul> |
|---|---|
| Push factors  |   |

Among interviewed returnees from Pakistan, 86% cited economic factors as the primary reason for their return, followed by "the deteriorating security conditions in the country of asylum" (5%), alleged harassment by authorities (3%), Afghan refugees settlement (Matani settlement closure in KPK in February 2014) closure or relocation campaign (1%), fear of arrest and/or deportation (1%), and other reasons (4%).

# **Pull factors**

49% of interviewed returnees cited improvement of the security situation<sup>\*</sup> in some parts of Afghanistan as the primary reason influencing their decision to return, followed by the UNHCR's assistance package (26%), better employment opportunities in Afghanistan (11%), land allocation scheme and/or UNHCR shelter program (7%), re-union with the family/relatives in Afghanistan (3%), none or reduced fear of persecution (2%) and improvement in health and education facilities (2%).

#### Information on the Voluntary Repatriation Program

All of the interviewed returnees from Pakistan said that they had received adequate information to make an informed decision to return. **Information on place of origin** was mainly obtained **through visits to Afghanistan (39%)**, from the Afghan community (38%), from UNHCR (4%), through media (5%) and other sources (14%). Among those who mentioned that they obtained information through visits to Afghanistan, all of them stated they travelled to Afghanistan on their own; 57% said they had visited Afghanistan few months ago, 27% said they had visited Afghanistan one year ago, 8% said two years ago, 7% said three years ago and 1% said more than five years ago. When they were asked about the purpose of their visit; 51% said they came to Afghanistan to visit their relatives, 27% said they participated in a ceremony, 16% said they visited Afghanistan in order to assess the situation to make an informed decision prior to the return and 6% said they visited Afghanistan for business purpose.

Similarly, **60%** of the interviewed returnees said that they obtained information **about UNHCR's repatriation operation** from the members of the Afghan community, **18%** stated that they learned about volrep when they visited Afghanistan, **14%** said that they obtained information directly from UNHCR, 5% said the obtained information through the media and 3% said they obtained information from other sources.

### Alleged arrests/detentions and intimidations in Pakistan

Nearly 1% of the interviewed returnees alleged that they had been arrested and/or detained during their stay in Pakistan due to unknown reasons e.g. PoR cards validity date etc. Money extortion/bribery, by the Pakistani police, which was a challenge for returnees in the past has been decreased (over 80% compared to 2013) since September 2013 when UNHCR Offices/VRCs in Pakistan started issuing complain collection form. Returning families are provided with a form and hotline number to report any problem (bribery, transportation tax, theft cases on the road, losing belonging, traffic incident and, etc.) to the UNHCR border monitors based at Torkham and Spin Boldak crossing points. However, it is still remains a concern. **Some 15%** of interviewed returnees stated that they faced problems (e.g. extortion by police) while traveling from the VRC to Torkham crossing point. Most of those faced problems alleged that they were asked by the Police to pay bribes because they were carrying livestock, construction material (used beams), or to avoid a search of the trucks.

\*Of those who cited the improvement of security situation in some parts of Afghanistan as primary pull factor of their return, some 81% returned to relatively secure provinces such as Kabul, Takhar, Balkh, Nangarhar, Herat, Samangan, Sari Pul, Parwan, Kapisa, Panjshir, Jawzjan, Baghlan and Kunduz. While 19% returned to insecure provinces such as Kandahar (mainly Kandahar city), Logar, Helmand (mainly Lashkargah), Wardak, Paktya, Farah (Farah city), Uruzgan and Zabul).

# Reasons for not returning to place of origin

Out of a total of 940 respondents, 323 returnees stated that they do not intend to repatriate to their place of origin due to the following reasons: lack of housing (49%), lack of land (21%), insecurity (16%), lack of income generation opportunities (6%), lack of public services (5%), and other reasons (3%).

On accommodation, 53% of interviewed returnees from Pakistan said that they plan to stay with relatives, 31% indicated that they will rent accommodation, and 16% said that they own a house in Afghanistan.

When asked " Do you have any concerns about your return to Afghanistan?" 89% of the interviewed returnees said "Yes". 52% of the concerns related to not having land to start agricultural activities while 39% related to having land but no shelter. 7% indicated lack of job opportunities, nearly 1% noted security as a concern and 1% indicated lack of education and health facilities. The primary obstacles discouraging Afghan refugees to make a decision for return have been lack of shelter and land.

# RETURNS FROM IRAN

| <ul> <li>During Jan and Jul, a total of 251 interviews were conducted at Hera EC with newly arrived returnees from Iran. Among these, 82% were Male and 18 % were Female, of whom:</li> <li>91% between age of 18 and 59</li> <li>9 % were elderly (60+ years)</li> <li>Ethnicity: 47 Tajik, 33% Hazara, 17% Pashtun, 2% Uzbek and 1% othera</li> </ul> | <ul> <li>42 % left Afghanistan during communist regime</li> <li>37 % during Taliban regime</li> <li>14 % stated they were born in Iran</li> <li>4% during Mujahedding period</li> </ul> |
|---|---|
|---|---|

### Push factors

Among the 251 interviewed returnees from Iran, 88% stated economic factors in Iran as the primary reason for return, followed by fear of arrest and/or deportation (5%), alleged harassment by the authorities (4%), lack of school and health facilities (1%) and other reasons (2%).

### Pull factors

68% on interviewed returnees from Iran indicated the Government land allocation scheme and/or UNHCR shelter program as the primary reason influencing their decision to return, followed by improvements of the security situation<sup>\*</sup> in some parts of Afghanistan (25%), improvement in health and education facilities (2%), none or reduced fear of persecution (1%), UNHCR's assistance package (1%), and other reasons (3%).

### Information on the Voluntary Repatriation Program

All of the interviewed returnees from Iran said that they had received adequate information to make an informed decision to return. **Information on place of origin** was mainly obtained from the Afghan community (83%), through visits to Afghanistan (14%) and other sources (3%). Among those who mentioned that they obtained information through visits to Afghanistan, all of them stated they travelled to Afghanistan on their own; 78% said they had visited Afghanistan five years ago, 11% said they had visited Afghanistan more than five years ago and 11% said they had visited Afghanistan three years ago. When they were asked about the purpose of their visit; 67% said they came to Afghanistan to visit their relatives, 22% said they visited Afghanistan in order to assess the situation to make an informed decision prior to the return, 7% said they participated in a ceremony and 4% said they visited Afghanistan for business purpose.

It is been noted that returnees from Iran, compared to returnees from Pakistan, did not have the chance or opportunity to visit their places of origin recently. Majority of the returnees from Iran mentioned that they had visited Afghanistan five years ago. While majority (over 50%) of the interviewed returnees from Pakistan mentioned they had visited Afghanistan recently. This might be the case with returnees from Iran mainly due to strict border control, long distance and probably changes in the security situation in Afghanistan.

Similarly, **83%** of the interviewed returnees said that they obtained information **about UNHCR's repatriation operation** from the members of the Afghan community, 14% stated that they learned about volrep when they visited Afghanistan, 1% said that they obtained information from the media (TV) and 1% other sources.

### Reasons for not returning to place of origin

Out of a total of 251 respondents, 86 returnees stated that they do not intend to repatriate to their area of origin due to the following reasons: lack of housing (46%), lack of income generation opportunities (30%), lack of public services (17%), insecurity (3%), lack of land (1%) and other reasons (3%).

On accommodation, 82% of those who returned from Iran said that they will stay with relatives, 15% indicated that they will rent accommodation and 3% said that they own a house.

When asked " Do you have any concerns about your return to Afghanistan?" nearly 77% of the interviewed returnees said " Yes". Among them, 49% cited the lack of job opportunities as a concern, 37% cited insecurity as a concern and. Only 7% of concerns related to not having land to start agricultural activities (which is very low compared to returnees from Pakistan) and 7% mentioned other reasons (mainly lack of shelter).

# BORDER MONITORING DEPORTATION OF UNDOCUMENTED AFGHAN NATIONALS (NON-REFUGEES)

Afghan nationals returning from Iran or Pakistan due to eviction, conflict, military operations, natural disasters, or other reasons do not fall under UNHCR's mandate, and all international response to their needs will be led by IOM. However, UNHCR in coordination with other protection actors monitors their protection situation to ascertain that registered refugees are not deported.

#### **IRAN:**

1 - 31 July 2014: A total of 11,955 undocumented Afghan nationals (non-refugees) were deported (via Islam Qala: 66% and Zaranj: 34% border points) from Iran. This figure is 17% lower compared to 14,340 deportees in June 2014.

1 January - 31 July 2014: The total number of deportees during the seven months of 2014 is 110,557 individuals which is 2% lower compared to the same period last year when 112,565 Afghans were deported (via Zaranj) from Iran.

A total number of 222,710 Afghans were deported from Iran in 2013, averaging 610 persons per day.

The vast majority of deportees (98%) were single males who entered Iran illegally, to look for work.

Since April 2009, IOM has been present in Islam Qala and Zaranj border crossing points and has procedures in place to screen and identify Persons with Special Needs (PSNs) among the deported undocumented Afghans (non-refugees).

IOM provides PSNs with transportation, transit and health services at the border and assists with their transportation costs from the cities of Herat and Zaranj to their final destinations.

#### **PAKISTAN:**

1 - 31 July 2014: A total of 584 undocumented Afghan nationals (non-refugees) were deported via Torkham (134) and Spin Boldak (450) border points. This figure reflect a slight decrease compared to 574 deportees in June 2014.

1 January - 31 July 2014: During the seven months of 2014, a total of 1,625 undocumented Afghan nationals (non-refugees) were deported via Torkham Border. This figure is 13% higher compared to 1,418 deportees during the same period in 2013.

Since November 2012, IOM has established a transit centre in Torkham to screen, identify and assist PSNs among deported undocumented Afghans (non-refugees). IOM provides PSNs with NFIs and free transportation from Torkham to their final destination.

In addition, 3,002 undocumented Afghan nationals (nonrefugees) were deported via Spin Boldak (SB). This figure is 6% lower compared to the 3,172 deportees during the same period in 2013.
