Concerned that human activities have been substantially increasing the atmospheric concentrations of greenhouse gases, that these increases enhance the natural greenhouse effect and that this will result on average in an additional warming of the Earth's surface and atmosphere and may adversely affect the natural ecosystem and humankind,

Acknowledging that the developed country parties must take the lead in combating climate change and its adverse effects,

Recalling the United Nations Millennium Declaration,² the Johannesburg Declaration on Sustainable Development³ and the Plan of Implementation of the World Summit on Sustainable Development (Johannesburg Plan of Implementation),⁴ the 2005 World Summit Outcome,⁵ the outcomes of the thirteenth to eighteenth sessions of the Conference of the Parties to the United Nations Framework Convention

Reaffirming also the financial obligations under the Convention of developed country parties and other developed parties included in annex II to the Convention and under the Kyoto Protocol to the United Nations Framework Convention on Climate Change,¹¹
