ANNEX A – TERMS OF REFERENCE (TOR)

Background:

Reference to the ongoing conflict and subsequent need to ensure support to POC's and authorities, UNHCR intends to establish a framework contract for provision of construction materials. Said contract would serve the purpose of having suppliers ready to provide necessary construction materials for: 1) basic self-made repairs to improve the living conditions of POCs within Ukraine, 2) support to conflict affected areas in need of materials for repair works. To that extent, UNHCR has created a list of basic materials to be costed by suppliers covering:

- Timber
- General construction materials
- Finishing materials
- Sanitary equipment
- Electrical appliances
- Windows

The above-mentioned materials intend to allow small repairs needed by residential buildings, that have suffered little or no structural damage, as to ensure they are ready to accommodate POCs, including during winter season. Furthermore, they will support efforts by authorities in repair/rebuilding areas that have since been made accessible to humanitarian assistance in the context of the ongoing conflict.
